Subject: Supplemental information for the review of the model no. DN30 package

Dear Mr. Saverot,

This letter is in response to your request for supplemental information (RSI, reference Docket No. 71-9362, EPID No. L-2018-NEW-0003).

RSI Provide the dose rates in the seal regions and the foam in the DN30 package.

In order to assess the cumulative radiation effects on polymer-based materials such as the seals and foams in the DN30 package, the dose rates at these regions are needed.

This information is required to determine compliance with 10 CFR 71.43 (d) and 71.47(a).

The internal dose rates in the DN30 package are provided in proprietary technical note 0023-BBR-2018-004 attached to this letter.

We will also take the observations on Criticality Evaluation and Operating Procedures into account and will prepare revised documentation to answer these points.

Sincerely,

DAHER NUCLEAR TECHNOLOGIES GmbH

Franz Hilbert
COO

Yara van Wijk
Project Manager
