Please reject the proposal to consolidate irradiated fuel at a dump in Texas. In the absence of a permanent repository operating, the waste would have to be moved again with all of the accompanying hazards.

If you proceed with this planning process, please hold public meetings in communities along all the potential routes for the waste transport. Extend the time for commenting 180 days. Be sure to include in the Environmental Impact Statement the scope, technical, social, geographic, cultural and political international impacts.

Thank you for considering these comment from a former resident of Texas.
