General Comment

This is a terrible and dangerous plan to ship such materials across the country to a site that is an unauthorized dump in a community that is poor and mostly Spanish speaking. The cask will not last long and will be vulnerable to all sorts of environmental and security dangers. The company that plans to do this work is not reliable and will not be there for the long term that will be needed to secure the nuclear waste which will last for centuries. Please do not allow this plan to happen. Keep nuclear waste where they were created and get a better plan for the future of our country.
