

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

October 10, 2018

Ms. Becky G. Eddy
U.S. Department of Energy
National Nuclear Security Administration
Y-12 National Security Complex
301 Bear Creek Road
Oak Ridge, TN 37831

Dear Ms. Eddy:

The U.S. Nuclear Regulatory Commission (NRC), is returning without further action, export license application XCOM1324, submitted on September 19, 2018. The application requests the export of 226 meters of zircalloy-4 tubing, for use in the Slowpoke-2 Research Reactor located at the Royal Military College of Canada.

In accordance with Title 10 of the *Code of Federal Regulations*, Part 110.26, because the requested material is a minor component of U.S. origin, described in paragraphs (5) through (11) of Appendix A, and is to be used in a research reactor located within a country listed in paragraph (b) of section 110.26, the equipment qualifies for export under a general license. Therefore, there is no need for a specific license.

If you have additional questions regarding this application or letter, please contact me at (301) 287-9072.

Sincerely,

A handwritten signature in black ink, which appears to read "Peter J. Habighorst", is written over the typed name.

Peter J. Habighorst, Chief
Export Controls and Nonproliferation Branch
Office of International Programs

Enclosure:
Application for Export License
