Subject: [External_Sender] Docket ID NRC-2016-0231

Docket ID NRC-2016-0231

There are Mobile Chernobyl Shipping Risks (WCS's own map, from its construction and operating licence application to NRC, shows the main line railways nation-wide that would be used to transport irradiated nuclear fuel from atomic reactors to West TX; another map, made by SEED Coalition, which includes some Interstate highway routing that could also be used, if NRC were to rubber-stamp a license amendment by WCS to allow Legal Weight Truck shipments).

There are risks of Routine or Incident-Free Shipments Nonetheless Being Like Mobile X-ray Machines That Can't Be Turned Off, and Risks of Externally Contaminated Shipments.

There are risks of De Facto Permanent Parking Lot Dump at WCS.

There are risks of Loss of Institutional Control if De Facto Permanent Parking Lot Dumps are Abandoned, Containers Fail, and Release Catastrophic Amounts of Hazardous Radioactivity into the Environment.

Why Are These Risks Being Taken?

Please cancel this project.

Thank you.
