SUMMARY AND ACTION REQUIRED (IF ANY) (Continued)

1. Due to changes to our licensing process Items 6-9 on your license will now appear differently going forward. Specifically, instead of allowing a blanket amount of material to be split between multiple types of devices, each device manufacturer and model will now have their own limit on the license in Items 6-9. Please provide a list or inventory of the materials to be authorized on the license that includes the following information:
 - a. Isotope Requested
 - b. Device Manufacturer
 - c. Device Model
 - d. Number of devices requested.
 - e. Maximum activity for any single source.
 - f. Total activity requested for devices of this manufacturer and model.
 - g. For any of these devices if a specific sealed source is requested please include the manufacturer and model number.

2. A copy of your Radiation Safety Program was included with your amendment request. Per our conversation please confirm that you would like to withdraw this section from your amendment request.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
