Western Nuclear Inc. (Split Rock)	Future Title II site	2801 2 year**	8/28/18	8/28/18	9/18/18 ML18260A113	August 2020
AREVA NC Inc., Lucky Mc Uranium Mill	Future Title II site	2801 2 year**	8/28/18	9/13/18	9/19/18 ML18257A159	August 2020
Anadarko Petroleum Corp. Bear Creek Uranium Co.	Future Title II site	2801 2 year**	8/31/18	9/20/18	9/26/18 ML18267A385	August 2020

* NRC Manual Chapter 2641, "In-situ Leach Facilities Inspection Program," dated August 25, 2000, states that the normal frequency for (most) inspection procedures is 6 months, with a minimum inspection frequency of 12 months. Extensions of inspection intervals can be implemented based on good licensee performance. Based on MC 2641 criteria, RIV made the decision to inspect these licensees on an annual basis.

** NRC Manual Chapter 2801, "Uranium Mill and 11e.(2) Byproduct Material Disposal Site and Facility Inspection Program," dated August 25, 2000, states that the minimum inspection frequency for (most) procedures is annually, with the normal frequency (mostly) semi-annual. Extensions of inspection intervals can be implemented based on good licensee performance. Based on MC 2801 criteria, RIV made the decision to extend the inspection frequency for these sites to biennially.
