

# Operability Inspections Public Meeting #2 Operability Responsibility Entry Criteria

Jane Marshall

Deputy Director, Division of Safety Systems  
Office of Nuclear Reactor Regulation

---

# Inspection of Operability

- The staff understands each licensee has responsibility for Technical Specification operability of Structures, Systems or Components.
  - The Reactor Oversight Process includes inspection of operability decisions.
  - When a deficient Technical Specification Structure, System or Component is deemed operable by an SRO while assessing entry criteria an inspector could evaluate the basis for that decision.
-

# Discussion
