Items of Interest
Week Ending October 26, 2018

List of Approved Spent Fuel Storage Casks: NAC International NAC-UMS® Universal Storage System, Certificate of Compliance No. 1015, Amendment No. 6, Direct Final Rule; Part 72 of Title 10 of the Code of Federal Regulations (Regulation Identifier Number 3150-AK12; NRC-2018-0075)

On October 22, 2018, the NRC published a direct final rule in the *Federal Register* (83 FR 53159) amending its regulations by revising the NAC International NAC-UMS® listing within the “List of approved spent fuel storage casks” to include Amendment No. 6 to Certificate of Compliance (CoC) No. 1015. Amendment No. 6 revises the CoC’s technical specifications to remove a redundant requirement for inspection, revise a limiting condition of operation (LCO) for heat removal, remove an inspection requirement that is already covered by LCO surveillance requirements, and clarify the meaning of “immediate” restoration of a concrete cask’s heat removal capabilities. Amendment No. 6 also clarifies that an LCO for loaded cask surface dose rates applies prior to storage conditions, when dose rates will be highest. The companion proposed rule was also published in the *Federal Register* on October 22, 2018 (83 FR 53191). Unless significant adverse comments are received, the direct final rule will become effective on January 7, 2019.
