Marty:

As we discussed a few minutes ago, it is our understanding (expressed in my email below) that NuScale will incorporate the changes shown below in green in the next DCA revision. As long as you track it and add in rev. 2 of the DCA, we do not need an interim supplement for this. Please note, there is no RAI associated with this. We will track it in the SE.

Thanks.

Subject: NuScale FSAR Draft Changes in Section 2.4.4

Marty:

The staff believes the draft editorial changes shown below and posted in NuScale eRR have clarified FSAR Section 2.4.4. The staff will confirm the changes in the next FSAR Revision.

“The presence of ~~dams~~ onsite, upstream, and downstream water control structures is site-specific and is addressed by the COL applicant as part of the response to COL 2.4-1.”

Please let me know if you have any questions.

Thanks.

Prosanta
