Subject: Status of Petition for Rulemaking: PRM-50-111

Mr. Leyse:

I am contacting you to provide a status update on the petition for rulemaking you submitted to the U.S. Nuclear Regulatory Commission (NRC), dated March 13, 2015. In your petition, you requested that the NRC require all nuclear power plant licensees to use in-core monitoring devices at different elevations and radial positions throughout the reactor core. The NRC docketed your letter as petition for rulemaking PRM-50-111, and the NRC published a notice of receipt in the Federal Register on July 16, 2015 (80 FR 42067). The NRC continues to address the resolution of the issues raised by PRM-50-111. The status of PRM-50-111 can be found at the NRC Rules and Petition page at <https://www.nrc.gov/reading-rm/doc-collections/rulemaking-ruleforum/active/PetitionIndex.html>. At this Web site there is a link to a listing of all active NRC PRMs. You can monitor this site for status updates as they become available.

You can also continue to monitor the docket for PRM-50-111 at <http://www.regulations.gov>. The Federal rulemaking Web site allows you to receive alerts when changes or additions occur in a docket folder. To subscribe: 1) navigate to the docket folder (NRC-2015-0124); 2) click the "Sign up for E-mail Alerts" link; and 3) enter your e-mail address and select how frequently you would like to receive e-mails (daily, weekly, or monthly).

Once the petition has been resolved, the NRC will publish a notice in the Federal Register explaining the NRC's finding. You will also receive a letter at that time notifying you of the action the NRC has taken.

Please contact me at Wendy.Reed@nrc.gov or (301) 415-7213 if you have any questions.

Sincerely,

Wendy Reed, Ph.D.
