Dear Ms Borges,

-
I am writing to oppose Waste Control Specialists' plan to open a de facto permanent parking lot dump for half the commercial high-level radioactive waste in the country. The proposed site is up-stream of the Ogalla aquafier, which supplies vital drinking water from South Dakota to Texas.

-
WSC would launch unprecedented numbers of high-risk irradiated nuclear fuel trains ("bomb trains") and barge shipments through many states. This plan is reckless and dangerous to millions of Americans.

-
Thank you for your consideration.

-
Respectfully,

-

Melissa Fleming
