Date: Monday, November 05, 2018 10:31:00 AM

Gerry,

Thank you for letting us know that the supplemental information, requested by the NRC staff's letter dated October 3, 2018 (ADAMS Accession No. ML18263A235), for acceptance of NCSU's fueled experiment amendment request dated August 27, 2018 (ADAMS Accession No. ML18241A135), will not be submitted by the November 5, 2018, date specified in the October 3, 2018, letter. In accordance with our October 3, 2018, letter, if supplemental information is not submitted by November 5, 2018, we will consider NCSU's August 27, 2018, request to be not accepted. However, you are free to resubmit the request on November 19, 2018, or at any other earlier or later date, and we will begin an acceptance review of the new submission (because this would be a new submission, there is no requirement to submit it by any specific date, although we would encourage you to keep us up to date if your plans change significantly). There is also no need to let the NRC staff know how you plan to make the new submission at this time.

I will place your November 2, 2018, email, and this response, into NRC public ADAMS to document the status of the amendment request. Please don't hesitate to contact me if you have any other questions.

Thanks,
Ed

Subject: [External_Sender] Re: Re: Re: Acceptance review of fueled experiment amendment

Ed,

The supplemental information requested on 10/3/18 (EPID no. L-2018-LLA-0247) for the fueled experiment amendment (Accession no ML18241A135) will not be submitted by November 5, 2018. We are requesting a November 19, 2018 submission date to allow time to complete our internal reviews.

Please inform me if we need to specify how the new submission will be made at this time or if we may do so on the date of the new submission. The options are to submit one document with the supplement information included with the original LAR or two separate documents

(the supplemental information and the original LAR).

thanks,
Gerry Wicks
