Dear Carol,

Per our conversation, we would like to amend our Radioactive Materials License (License # 11-27371) and add Dr. Theresa Pagliuca as an authorized user for materials identified in 10CFR35.300. I have attached a previous radioactive materials state license from New York on which Dr. Pagliuca is listed as an authorized user.

I would like to request that this request be expedited because we have a patient who may require a Xofigo (Ra-223) therapy in the near future.

Dr. Pagliuca has expressed a potential interest in oral administration of sodium iodide in quantities greater than or equal to 33 mCi for thyroid cancer therapy. I have attached her previous educational and clinical experience. I did not see anything specific to I-131 therapy. What would she need to do to become an authorized user?

Finally, we also would like to remove Dr. Edward Abraham from our authorized user list. Thank you.

Regards,

Douglas Heidorn, RSO
