Subject: [External_Sender] NRC Docket 72-1050 NRC 2016-0231

My family and I insist that you reject the Proposal to consolidate irradiated fuel. First, it is illegal! It is not allowed under federal law until there is a permanent repository operating. Also, the application must be published in Spanish as well as English so that all residents in the region can review it.

Public meetings must be held as soon as possible and held in communities along all the potential routes, especially in Texas. The time for commenting needs to be extended to 180 days.

The welfare of our families is at stake! The Environmental Impact Statement needs to include social, cultural and political impacts. Other impacts must also be studied, including the potential for earthquakes, water contamination, and environmental injustice to nearby inhabitants, including families and children.
