May Ma ,

RE: Spent Nuclear Waste/Waste Control Specialists LLC's

To Whom It May Concern:

We are hopeful that there are better options then transporting this very toxic substance so far and with the end result being a facility that is very close to populations.

Under the Nuclear Waste Policy Amendments Act of 1987, the WCS facility cannot legally operate, so the NRC shouldn't even be considering the license application.

We, as Texans, don't want high-level radioactive waste created in another state to end up in ours.

WCS has already proven they are not a reliable, safe option.

For health and safety both licenses should be rejected.

Thank you for your time and service to this country.
