

UNITED STATES
NUCLEAR REGULATORY COMMISSION

November 19, 2018

Mr. Robin DeLaBarre
Office of Nuclear Energy,
Safety & Security, Room 3320 HST
Bureau of International Security
& Nonproliferation
U.S. Department of State
2201 C Street, NW
Washington, DC 20520

Dear Mr. DeLaBarre:

Enclosed is an application dated November 5, 2018, recently received by the U.S. Nuclear Regulatory Commission (NRC), from SRB Technologies, Inc., requesting amendment No. 01 to its existing license, XB1331-R. The license presently authorizes the annual export of up to 9,250 terabecquerels of self-illuminated tritium (H-3) light sources and devices to SRB Technologies (Canada), Inc.

The purpose of the amendment is to extend the date of expiration from December 31, 2018, to December 31, 2023.

There are no changes to the terms and conditions of the existing license being requested. Therefore, our office is processing this as a minor amendment, and if no comments are received from the public within the 30-day comment period, and it is determined that applicable legal requirements are satisfied, the NRC will issue the license.

Sincerely,

A handwritten signature in black ink, appearing to read "Peter J. Habighorst".

Peter J. Habighorst, Chief
Export Controls and Nonproliferation Branch
Office of International Programs
