Re: License # 24-01570-03

Dear Sir/Madam:

This is a request for amendment to the specific license for St. Luke's Hospital.

We request an amendment of our radioactive material license to add Cs-131 permitted by 10 CFR 35.400, specifically the IsoRay Model CS-1 Cesium-131 brachytherapy Seed. The CS-1 is a sealed source for manual brachytherapy. It is listed in the Sealed Source and Device Registry as WA-1220-S-101-S. We request approval to possess at any one time a total activity of 1000 mCi.

If you have any questions regarding this amendment request, please contact Dr. Christopher Durbin at (314) 205-6218.

Sincerely,

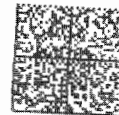

Diane Ray, RN FACHE  
Senior Vice President  
Chief Operating Officer  
Network Chief Nursing Officer
