NOV 21 2018

Sharon L. Long
Radiation Safety Officer
Sharon L. Long Consulting
1296 Russell Drive
Bolivar, OH 44612

Dear Ms. Long:

In the letter dated August 24 2018, and the NRC Form 314 dated August 24, 2018, you requested the termination of License Number 34-26655-02.

The NRC staff has reviewed your final status surveys. As defined in 10 CFR 20.1003, "*Survey* means an evaluation of the radiological conditions and potential hazards incident to the production, use, transfer, release, disposal, or presence of radioactive material or other sources of radiation. When appropriate, such an evaluation includes a physical survey of the location of radioactive material and measurements or calculations of levels of radiation, or concentrations or quantities of radioactive material present."

Within this context, your final status surveys consisted of stating that you never possessed radioactive materials in greater than exempt quantities under this license for use at temporary job sites in the U.S. anywhere that NRC has jurisdiction.

You stated that you have no restricted area controlled by this license. As defined in 10 CFR 20.1003, "*Restricted area* means an area, access to which is limited by the licensee for the purpose of protecting individuals against undue risks from exposure to radiation and radioactive materials. Restricted area does not include areas used as residential quarters, but separate rooms in a residential building may be set apart as a restricted area."

Based on your statements and assertions, no further remediation or actions with respect to NRC regulated material is required. You have no facility to release for unrestricted use under this license.

Your NRC license number 21-32616-01 is hereby terminated in the enclosed Amendment No. 7.

If you have any questions, you may contact me directly at (630) 829-9841 and my fax number is (630) 515-1078. My email address is colleen.casey@nrc.gov.

S. Long
