2100 RENAISSANCE BLVD.
KING OF PRUSSIA, PA 19406-2713

November 15, 2018

Robert Klein, President
Logan Regional Medical Center, LLC
d/b/a Logan Regional Medical Center
20 Hospital Drive
Logan, West Virginia 25601-3474

SUBJECT: LOGAN REGIONAL MEDICAL CENTER, LLC; CONSENT TO TRANSFER
LICENSE; MAIL CONTROL NO. 609822

Dear Mr. Klein:

By the letter dated August 28, 2018, LifePoint Health, Inc. requested written consent by the U.S. Nuclear Regulatory Commission (NRC) to a proposed indirect transfer of control of NRC Materials License No. 47-19919-01. Based on the information you provided, we understand that, as a result of the proposed merger between LifePoint Health, Inc. and RegionalCare Hospital Partners Holdings, Inc. d/b/a RCCH Healthcare Partners, control of Logan Regional Medical Center will indirectly be transferred to RCCH Healthcare Partners. We understand that this transfer will not result in any change to the location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report, which documents the NRC staff's safety review of the request, and in accordance with 10 CFR 30.34, the NRC approves the proposed transfer. An environmental assessment for this action has not been prepared by the NRC because this action is categorically excluded under 10 CFR 51.22(c)(21). We understand that the transfer will take place on November 16, 2018. Please note that you will need to notify us promptly, in writing, after the transaction has been finalized and include a signed copy of the sales agreement confirming completion of the transaction. If this planned sale has not been consummated within 30 days of the date of this letter, please notify us in writing. Please contact Robert Gallagher at 610-337-5182, or by e-mail at robert.gallagher@nrc.gov.

Future changes in the licensee's name, licensed use, licensed materials, licensed location, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <https://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document

Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <https://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by the NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action(s) against you. This could include issuance of a Notice of Violation, or Imposition of a Civil Penalty, or an Order Suspending, Modifying or Revoking Your License as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available at: <https://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web Site at: <https://www.nrc.gov/about-nrc/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Thank you for your cooperation in this matter.

Sincerely,

Robert L. Gallagher, Health Physicist
Medical and Licensing Assistant Branch
Division of Nuclear Materials Safety
