Re: MOUs for Physician AUs for Radiopharmaceutical Therapy

Dear Sir/Madam:

I would greatly appreciate the following information under the Freedom of Information Act. I request the Memoranda of Understanding between the American Board of Nuclear Medicine, the American Board of Radiology for Therapeutic Radiology, and the American Board of Radiology for Diagnostic Radiology with the NRC in which the respective boards verify that their approved residency training programs are in compliance with the training and experience requirements of 10 CFR Part 35 for radiopharmaceutical therapy. I also request the letters from the NRC accepting the respective boards' assurances. These letters from the boards and the NRC's approval of them would likely date around the year 2000 or 2001.

I have searched the NRC web site for several hours but have been unable to locate these documents. It would not be necessary for you to send me actual paper copies of these documents if you can send me direct urls for them. My e-mail address is csmarcus@ucla.edu.

Thank you for your attention and consideration.

Sincerely,

Carol S. Marcus, Ph.D., M.D.

Prof. of Radiation Oncology, of Molecular and Medical Pharmacology (Nuclear Medicine), and of Radiological Sciences, ret., David Geffen School of Medicine at the University of California, Los Angeles
