Re: Docket No. 70-925; License No. SNM-928
Annual Report of License Condition 27(e) Changes for 2017

Dear Mr. Kalman:

License Condition 27(e)(3) states, “The licensee shall provide in an annual report to NRC, a description of all changes, tests, and experiments made or conducted pursuant to this condition, including a summary of the safety and environmental evaluation of each such action.” During the NRC inspection conducted by Region IV personnel, it was noted that no annual report for 2017 had been submitted to NRC.

I explained that there were no changes, tests, or experiments made or conducted pursuant to license condition 27(e), and that because no such changes were made, no report of changes was submitted to NRC.

Region IV personnel stated that a letter should have been submitted stating that there were no such changes to satisfy this license condition.

This letter is therefore submitted to satisfy the requirements of License Condition 27(e)(3), notifying NRC that no changes, tests, or experiment were made or conducted pursuant to License Condition 27(e) during 2017.

Sincerely,

Jeff Lux, P.E.
Project Manager
