Attachment 3  
Plugged Tube Lists

The following is a list of the tubes plugged in both 'A' and 'B' steam generators as a result of the 4C4F reevaluation due to the Palisades Technical Specification requirements (ie, wastage and blocked tubes). The table includes location (quadrant, line, row and elevation) and probe data for the 4C4F probe (NEW 4C4) or the 540SFW probe (SFW). Also included is a list of tubes plugged as a result of the tube pulling effort.

Definition of Symbols

xx - Crack-like indication

51 - Number pertaining to percent of through-wall penetration

BLK - Tube would not pass the 0.540-inch diameter probe (blocked)

A S/G : 4C4 (>=51%), SFW (>=58%), XX & BLOCKED TUBES
