

IFSAR Table of Contents

Chapter 1 — Introduction and General Description of the Plant

Chapter 2 — Site Characteristics

Chapter 3 — Design of Structures, Components, Equipment and Systems

Chapter 4 — Reactor

Chapter 5 — Reactor Coolant System and Connected Systems

Chapter 6 — Engineered Safety Features

Chapter 7 — Instrumentation and Controls

Chapter 8 — Electric Power

Chapter 9 — Auxiliary Systems

Chapter 10 — Steam and Power Conversion

Chapter 11 — Radioactive Waste Management

Chapter 12 — Radiation Protection

Chapter 13 — Conduct of Operation

Chapter 14 — Initial Test Program

Chapter 15 — Accident Analyses

Chapter 16 — Technical Specifications

Chapter 17 — Quality Assurance

Chapter 18 — Human Factors Engineering

Chapter 19 — Probabilistic Risk Assessment

Color	Description
	Original Westinghouse AP1000 DCD Revision 19 content (part of plant-specific DCD)
	Departures from AP1000 DCD Revision 19 content (part of plant-specific DCD)
	Standard FSAR content
	Site-specific FSAR content
	Linked cross-references (chapters, appendices, sections, subsections, tables, figures, and references)

TABLE OF CONTENTS

<u>Section</u>	<u>Title</u>	<u>Page</u>
2.0	Site Characteristics	2.0-1
2.1	Geography and Demography	2.1-1
2.1.1	Site Location and Description	2.1-1
2.1.1.1	Site Location	2.1-1
2.1.1.2	Site Description	2.1-2
2.1.1.3	Boundary for Establishing Effluent Release Limits	2.1-3
2.1.2	Exclusion Area Authority and Control	2.1-3
2.1.2.1	Authority	2.1-4
2.1.2.2	Control of Activities Unrelated to Plant Operation	2.1-4
2.1.2.3	Arrangements for Traffic Control	2.1-4
2.1.2.4	Abandonment or Relocation of Roads.....	2.1-4
2.1.3	Population Distribution	2.1-4
2.1.3.1	Resident Population Within 10 Miles	2.1-5
2.1.3.2	Resident Population Between 10 and 50 Miles	2.1-5
2.1.3.3	Transient Population.....	2.1-6
2.1.3.4	Low Population Zone.....	2.1-9
2.1.3.5	Population Center.....	2.1-10
2.1.3.6	Population Density.....	2.1-10
2.1.4	Combined License Information for Geography and Demography.....	2.1-12
2.1.5	References.....	2.1-12
2.2	Nearby Industrial, Transportation, and Military Facilities	2.2-1
2.2.1	Locations and Routes	2.2-1
2.2.2	Descriptions	2.2-2
2.2.2.1	Description of Facilities.....	2.2-2
2.2.2.2	Description of Products and Materials.....	2.2-2
2.2.2.3	Description of Pipelines	2.2-4
2.2.2.4	Description of Waterways.....	2.2-4
2.2.2.5	Description of Highways	2.2-5
2.2.2.6	Description of Railroads	2.2-5
2.2.2.7	Description of Airports	2.2-5
2.2.2.8	Projections of Industrial Growth.....	2.2-9
2.2.3	Evaluation of Potential Accidents	2.2-10
2.2.3.1	Determination of Design-Basis Events	2.2-11
2.2.3.2	Effects of Design Basis Events.....	2.2-31
2.2.4	Combined License Information for Identification of Site-Specific Potential Hazards.....	2.2-31
2.2.5	References.....	2.2-31
2.3	Meteorology	2.3-1
2.3.1	Regional Climatology	2.3-1
2.3.1.1	Data Sources	2.3-2
2.3.1.2	General Climate.....	2.3-4
2.3.1.3	Severe Weather.....	2.3-5
2.3.1.4	Meteorological Data for Evaluating the Ultimate Heat Sink.....	2.3-16
2.3.1.5	Design Basis Dry and Wet Bulb Temperatures	2.3-16
2.3.1.6	Restrictive Dispersion Conditions.....	2.3-18
2.3.1.7	Climate Changes	2.3-19
2.3.1.8	References	2.3-21

TABLE OF CONTENTS (CONTINUED)

LIST OF TABLES

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2-1	Not Used	2.0-2
2.0-201	Comparison of AP1000 DCD Site Parameters and Turkey Point Units 6 & 7 Site Characteristics	2.0-3
2.0-202	Comparison of Predicted Units 6 & 7 Control Room X/Q Values with AP1000 DCD Acceptance Criteria	2.0-10
2.2-1	AP1000 OnSite Explosion Safe Distances	2.2-36
2.2-201	Description of Facilities — Products and Materials	2.2-37
2.2-202	Onsite Chemical Storage Units 1 through 7	2.2-38
2.2-203	Offsite Chemical Storage — Homestead Air Reserve Base	2.2-42
2.2-204	Units 6 & 7 Pipeline Information Summary	2.2-43
2.2-205	Hazardous Chemical Waterway Freight, Intracoastal Waterway, Miami to Key West, Florida	2.2-43
2.2-206	Aircraft Operations — Significant Factors	2.2-44
2.2-207	Units 1-5 Onsite Chemical Storage — Disposition	2.2-45
2.2-208	Units 6 & 7 Onsite Chemical Storage — Disposition	2.2-48
2.2-209	Offsite Chemicals, Disposition — Homestead Air Reserve Base	2.2-52
2.2-210	Transportation — Navigable Waterway, Turkey Point Lateral Pipeline, and Onsite Transportation Route — Disposition	2.2-53
2.2-211	Atmospheric Input Data for the ALOHA Model	2.2-54
2.2-212	ALOHA Meteorological Sensitivity Analysis Inputs	2.2-55
2.2-213	Design Basis Events — Explosions	2.2-56
2.2-214	Design-Basis Events, Flammable Vapor Clouds (Delayed Ignition) and Vapor Cloud Explosions	2.2-57
2.2-215	Design-Basis Events, Toxic Vapor Clouds	2.2-58
2.3.1-201	NWS and Cooperative Observing Stations Near the Units 6 & 7 Site	2.3-25
2.3.1-202	Local Climatological Data Summary for Miami, Florida	2.3-26
2.3.1-203	Climatological Extremes at Selected NWS and Cooperative Observing Stations in the Area of Units 6 & 7	2.3-27
2.3.1-204	Monthly, Seasonal, and Annual Morning and Afternoon Mixing Heights and Wind Speeds for the Area of Units 6 & 7	2.3-29
2.3.2-201	Seasonal and Annual Mean Wind Speeds Units 6 & 7 (2002, 2005, and 2006)	2.3-44
2.3.2-202	Wind Direction Persistence/Wind Speed Distributions for the Units 6 & 7 Site 10-Meter Level	2.3-45
2.3.2-203	Wind Direction Persistence/Wind Speed Distributions for the Units 6 & 7 Site 60-Meter Level	2.3-48
2.3.2-204	Seasonal and Annual Vertical Stability Class and 10-Meter Level Wind Speed Distributions for Units 6 & 7 Site (2002, 2005, and 2006)	2.3-51
2.3.2-205	Joint Frequency Distribution of Wind Speed and Wind Direction (10-Meter Level) by Atmospheric Stability Class for Units 6 & 7 Site (2002, 2005, and 2006)	2.3-52
2.3.2-206	Joint Frequency Distribution of Wind Speed and Wind Direction (60-Meter Level) by Atmospheric Stability for Units 6 & 7 Site (2002, 2005, and 2006)	2.3-60

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2.3.2-207	Climatological Normals at Selected NWS and Cooperative Observing Stations in the Area of the Units 6 & 7 Site	2.3-68
2.3.2-208	Climatological Extremes at Selected NWS and Cooperative Observing Stations in the Area of the Units 6 & 7 Site	2.3-69
2.3.2-209	CALPUFF Predicted Visible Cooling Tower Vapor Plume Height and Length — All Hours	2.3-71
2.3.2-210	CALPUFF Predicted Visible Cooling Tower Vapor Plume Height and Length — Daylight Hours	2.3-72
2.3.3-201	Units 6 & 7 System Meteorological Instrumentation.....	2.3-126
2.3.3-202	Meteorological Tower Siting Conformance Status	2.3-127
2.3.3-203	Meteorological Sensor Siting Conformance Status	2.3-128
2.3.3-204	Units 6 & 7 Meteorological System — Operational Configuration.....	2.3-130
2.3.3-205	Units 6 & 7 Annual Data Recovery Rate (in percent) for Existing Meteorological Monitoring System (2002, 2005, and 2006).....	2.3-132
2.3.4-201	Distances from the Source Boundary Area	2.3-141
2.3.4-202	Units 6 & 7 Ground Level Release PAVAN Output — X/Q Values (s/m^3) at the Exclusion Area Boundary — Building Wake Credit Not Included	2.3-142
2.3.4-203	Units 6 & 7 Ground Level Release PAVAN Output — X/Q Values (s/m^3) at the Exclusion Area Boundary — Building Wake Credit Included.....	2.3-143
2.3.4-204	Units 6 & 7 Ground Level Release PAVAN Output — X/Q Values (s/m^3) at the Low Population Zone	2.3-144
2.3.4-205	ARCON96 X/Q (s/m^3) Values at the Control Room HVAC Intake.....	2.3-145
2.3.4-206	ARCON96 X/Q (s/m^3) Values at the Annex Building Access Door	2.3-146
2.3.5-201	Source to Sensitive Receptor Distances from Units 6 & 7	2.3-150
2.3.5-202	XOQDOQ Predicted X/Q and D/Q Values at Receptors of Interest	2.3-151
2.3.5-203	XOQDOQ-Predicted Annual Average X/Q Value at the Standard Radial Distances and Distance Segment Boundaries — No Decay, Undepleted	2.3-152
2.3.5-204	XOQDOQ-Predicted Annual Average X/Q Value at the Standard Radial Distances and Distance Segment Boundaries — 2.26-Day Decay, Undepleted	2.3-154
2.3.5-205	XOQDOQ-Predicted Annual Average X/Q Value at the Standard Radial Distances and Distance Segment Boundaries — 8-Day Decay, Depleted	2.3-156
2.3.5-206	XOQDOQ-Predicted Annual Average D/Q value at the Standard Radial Distances and Distance Segment Boundaries	2.3-158
2.3.5-207	XOQDOQ-Predicted Annual Average X/Q and D/Q Values at Sensitive Receptors	2.3-160
2.4.1-201	East Miami-Dade County Drainage Subbasin Areas and Outfall Structures	2.4.1-11
2.4.1-202	Summary of Data Records for Gage Stations at S-197, S-20, S-21A, and S-21 Flow Control Structures	2.4.1-12
2.4.1-203	Monthly Mean Flows at the Canal C-111 Structure S-197	2.4.1-13
2.4.1-204	Monthly Mean Water Level at the Canal C-111 Structure S-197 (Headwater).....	2.4.1-15

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2.4.1-205	Monthly Mean Flows in the Canal L-31E at Structure S-20	2.4.1-17
2.4.1-206	Monthly Mean Water Levels in the Canal L-31E at Structure S-20 (Headwaters).....	2.4.1-19
2.4.1-207	Monthly Mean Flows in the Princeton Canal at Structure S-21A	2.4.1-21
2.4.1-208	Monthly Mean Water Levels in the Princeton Canal at Structure S-21A (Headwaters).....	2.4.1-23
2.4.1-209	Monthly Mean Flows in the Black Creek Canal at Structure S-21	2.4.1-25
2.4.1-210	Monthly Mean Water Levels in the Black Creek Canal at Structure S-21	2.4.1-27
2.4.1-211	NOAA Tide Gages near Units 6 & 7 and Corresponding Tidal Range	2.4.1-29
2.4.1-212	SFWMD Water Use Permits Within a 10-Mile Radius.....	2.4.1-30
2.4.2-201	List of Major Flooding Events in Miami-Dade County, Florida.....	2.4.2-9
2.4.2-202	Peak Water Levels at Card Sound Canal Gage.....	2.4.2-10
2.4.2-203	Peak Water Levels at Manatee Bay Creek Gage.....	2.4.2-10
2.4.2-204	Peak Water Levels at West Highway Creek Gage	2.4.2-11
2.4.2-205	Peak Tide Level at Virginia Key Tide Gage Station	2.4.2-11
2.4.2-206	Peak Tide Level at Vaca Key Tide Gage Station	2.4.2-12
2.4.2-207	Units 6 & 7 Site Short Duration Local PMP Depths.....	2.4.2-12
2.4.2-208	Subbasin Drainage Area	2.4.2-13
2.4.2-209	Subbasin Point of Interest (POI) Drainage Areas.....	2.4.2-14
2.4.2-210	Swale Dimensions	2.4.2-15
2.4.2-211	Units 6 & 7 Subbasin Local PMP Peak Discharges	2.4.2-17
2.4.2-212	Flow Depth Over the Crest of Makeup Water Reservoir Walls	2.4.2-18
2.4.2-213	Total Discharge Over the Northern Wall of the Makeup Water Reservoir	2.4.2-18
2.4.2-214	Units 6 & 7 Flow Path Cross Section PMP Peak Discharge	2.4.2-19
2.4.2-215	HEC-RAS Model Result for Units 6 & 7	2.4.2-21
2.4.2-216	Sheet Flow Depth Over the Retaining Wall.....	2.4.2-24
2.4.2-217	Sheet Flow Depth Near Safety-Related Buildings.....	2.4.2-24
2.4.2-223	Units 6 & 7 Local PMP HEC-RAS Cross Section and PMP Flood Level: Parking Lot East Cross Section 10 IS.....	2.4.2-35
2.4.5-201	Probable Maximum Hurricane Characteristics	2.4.5-11
2.4.5-202	Summary of Historical Hurricane Events in the Florida Atlantic and Gulf Coasts.....	2.4.5-12
2.4.5-203	The Saffir-Simpson Hurricane Scale	2.4.5-15
2.4.6-201	Characteristics of Landslides on the U.S. Atlantic Margin.....	2.4.6-45
2.4.6-202	Summary of Historical Tsunami Run-Up Events in the East Coast of U.S.	2.4.6-46
2.4.6-203	Grid Resolution and Sizes of the Subdomains.....	2.4.6-48
2.4.6-204	Horizontal and Vertical Resolutions of Depth Data	2.4.6-49
2.4.6-205	Nested Grids in FUNWAVE-TVD for Cape Fear Tsunami	2.4.6-49
2.4.6-206	Nested Grids in FUNWAVE-TVD for Florida Escarpment Tsunami	2.4.6-49
2.4.6-207	Nested Grids in FUNWAVE-TVD for Great Bahama Bank Tsunami....	2.4.6-49
2.4.7-201	USGS Stations Used to Characterize the Typical Water Temperatures Near Units 6 & 7.....	2.4.7-3

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2.4.7-202	Subfreezing and Corresponding Daily Average Temperatures at NCDC Stations Near Units 6 & 7	2.4.7-4
2.4.11-201	Makeup Water Flow Requirements for Units 6 & 7	2.4.11-5
2.4.12-201	Summary of Units 6 & 7 Observation Well Construction Data	2.4.12-36
2.4.12-202	Historical and Projected Groundwater Use in Miami-Dade County....	2.4.12-37
2.4.12-203	Public Water Supply Systems in Miami-Dade County.....	2.4.12-38
2.4.12-204	Vertical Hydraulic Gradients	2.4.12-43
2.4.12-205	Representative Hydrogeologic Properties in Miami-Dade County	2.4.12-47
2.4.12-206	Regional Aquifer Properties	2.4.12-48
2.4.12-207	Regional Hydrogeologic Properties from Rock Core Samples.....	2.4.12-55
2.4.12-208	Slug Test Hydraulic Conductivity Summary	2.4.12-72
2.4.12-209	Summary of Units 6 & 7 Aquifer Pumping Test Results	2.4.12-76
2.4.12-210	Summary of Units 6 & 7 Groundwater Field Measurements	2.4.12-77
2.4.12-211	Units 6 & 7 Hydrogeochemical Data	2.4.12-79
2.4.12-212	Reclaimed Water Estimated Constituents and Concentrations Discharged to Deep Injection Wells	2.4.12-83
2.4.12-213	Saltwater Estimated Constituents and Concentrations Discharged to Deep Injection Wells.....	2.4.12-85
2.4.12-214	Water Quality Summary from Turkey Point Pumping Test.....	2.4.12-87
2AA-201	Density Measurements Collected in February 2009	2AA-5
2AA-202	Density Measurements Collected in November 2009	2AA-6
2AA-203	Density Measurements Collected in February 2010	2AA-7
2AA-204	Reference Heads for June 29, 2008 Potentiometric Surface Map (approximately 7am, high tide)	2AA-8
2AA-205	Reference Heads for June 29, 2008 Potentiometric Surface Map (approximately 2pm, low tide)	2AA-8
2AA-206	Reference Heads for August 15, 2008 Potentiometric Surface Map (approximately 10am, high tide)	2AA-9
2AA-207	Reference Heads for August 15, 2008 Potentiometric Surface Map (approximately 5pm, low tide)	2AA-9
2AA-208	Reference Heads for October 5, 2008 Potentiometric Surface Map (approximately 1am, high tide)	2AA-10
2AA-209	Reference Heads for October 5, 2008 Potentiometric Surface Map (approximately 8am, low tide)	2AA-10
2AA-210	Reference Heads for January 20, 2009 Potentiometric Surface Map (approximately 7pm, high tide)	2AA-11
2AA-211	Reference Heads for January 21, 2009 Potentiometric Surface Map (approximately 2am, low tide)	2AA-11
2AA-212	Reference Heads for July 15, 2009 Potentiometric Surface Map (7am, high tide)	2AA-12
2AA-213	Reference Heads for July 15, 2009 Potentiometric Surface Map (2pm, low tide).....	2AA-12
2AA-214	Reference Heads for January 15, 2010 Potentiometric Surface Map (11am, high tide)	2AA-13
2AA-215	Reference Heads for January 15, 2010 Potentiometric Surface Map (6pm, low tide).....	2AA-13
2AA-216	Data Acceptable for Use	2AA-14

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2AA-217	Maximum and Minimum Recorded Water Level Elevations	2AA-15
2AA-218	Density Measurements Collected in June 2010	2AA-16
2AA-219	Reference Heads for June 15, 2010 Potentiometric Surface Map (2am, high tide)	2AA-17
2AA-220	Reference Heads for June 15, 2010 Potentiometric Surface Map (9am, low tide).....	2AA-18
2BB-201	Observation Well and Pumping Well Construction Data	2BB-14
2BB-202	Hydrogeologic Unit Thicknesses	2BB-17
2BB-203	Summary of Unit 6 Shallow Test Results	2BB-18
2BB-204	Summary of Unit 6 Deep Test Results	2BB-19
2BB-205	Summary of Unit 7 Shallow Test Results	2BB-20
2BB-206	Summary of Unit 7 Deep Test Results	2BB-21
2BB-207	Summary of Aquifer Testing Results	2BB-22
2CC-201	Station S20F: Rainfall Data for February to May 2009.....	2CC-42
2CC-202	Station S20F: Annual Rainfall Data	2CC-43
2CC-203	Extinction Depth and Maximum Evapotranspiration Rate	2CC-44
2CC-204	Regional Hydraulic Conductivity Values Based on Onsite Tests and Literature Review	2CC-45
2CC-205	Surface Water Levels Corrected to Reference Density.....	2CC-46
2CC-206	Model Calibration — Hydraulic Conductivity	2CC-47
2CC-207	Model Calibration PW-7L — Measured Versus Simulated Drawdowns (at end of test)	2CC-48
2CC-208	Model Calibration PW-1 — Measured Versus Simulated Drawdowns (at the end of test)	2CC-49
2CC-209	Model Calibration PW-7U — Measured Versus Simulated Drawdowns (at end of test)	2CC-50
2CC-210	Model Validation PW-6U — Measured Versus Simulated Drawdowns (at end of test)	2CC-51
2CC-211	Phase 1 — Radial Collector Wells — Origin of Water (including sensitivity analysis).....	2CC-52
2CC-212	Phase 1 — Radial Collector Wells — Approach Velocity (including sensitivity analysis).....	2CC-53
2CC-213	Phase 2 — Simulated Heads Observation Points in Model Layer 1 Near Units 6 & 7	2CC-54
2.4.13-201	Radionuclide Concentrations in the AP1000 Effluent Holdup Tanks .	2.4.13-19
2.4.13-202	Particle Tracking Results.....	2.4.13-21
2.4.13-203	Groundwater Concentrations for Primary Conceptual Model Considering Advection and Decay Only.....	2.4.13-22
2.4.13-204	Results of K_d Analysis	2.4.13-24
2.4.13-205	Groundwater Concentrations for Primary Conceptual Model Considering Advection, Decay, and Retardation.....	2.4.13-25
2.4.13-206	Transport Model - Hydrogeologic Parameters	2.4.13-26
2.4.13-207	Surface Water Concentrations for Primary Conceptual Model Considering Advection, Decay, Retardation and Dilution.....	2.4.13-27
2.4.13-208	Primary Conceptual Model Dose Results.....	2.4.13-28
2.4.13-209	Transport Model - Total Activity.....	2.4.13-29

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2.4.13-210	MT3DMS Output - Model Layer 1 Maximum Concentration at CW-2s	2.4.13-30
2.4.13-211	Alternate Conceptual Model Dose Results Considering Advection, Decay, Retardation and Dispersion.....	2.4.13-31
2.5.1-201	Locations of DSDP and ODP Drill Sites Referenced in FSAR 2.5	2.5.1-246
2.5.1-202	K/Pg and Cenozoic Boundary Events Affecting the Caribbean, Gulf of Mexico, and Florida Regions	2.5.1-247
2.5.1-203	Florida's Marine Terraces, Elevations, and Probable Ages	2.5.1-248
2.5.1-204	Summary of Regional Fault Zones of Cuba	2.5.1-249
2.5.1-205	Correlation of Morphotectonic Zones and Tectonic Terranes in Hispaniola.....	2.5.1-251
2.5.1-206	Tectonic Interpretation of Terranes in Hispaniola.....	2.5.1-252
2.5.1-207	NOAA NGDC Database Tsunami Run-Up Events	2.5.1-253
2.5.1-208	Marine Terraces in the Matanzas Area of Northern Cuba.....	2.5.1-254
2.5.1-209	Marine Terrace Sequences in Southern Florida.....	2.5.1-256
2.5.1-210	Coordinates for Karst Features Presented in Figures 2.5.1-390 and 2.5.1-391	2.5.1-257
2.5.2-201	Earthquake Catalog for the Phase 1 Investigation Region [22°N to 35°N, 100°W to 65°W] for which the Events are Rmb Magnitude Greater than or Equal to 3.0 or Intensity [Int] Greater than or Equal to IV(4)	2.5.2-93
2.5.2-202	Conversion between Body-Wave (mb) and Moment (Mw) Magnitudes(a)	2.5.2-117
2.5.2-203	Earthquake Catalog for the Phase 2 Investigation Region [15°N to 24°N, 100°W to 65°W] for which the Events are M _w Magnitude Greater than or Equal to 6.0	2.5.2-118
2.5.2-204	Seismicity Events Recommended for Recurrence Analysis within the Gulf of Mexico	2.5.2-128
2.5.2-205	Region 2 Matrix of Detection Probabilities; Modified to Extend the Matrix to Year 2007	2.5.2-129
2.5.2-206	Matrix of Detection Probabilities for the Gulf of Mexico.....	2.5.2-131
2.5.2-207	Summary of EPRI Seismic Sources within the Site Region	2.5.2-132
2.5.2-208	Mean and Fractile Seismic Hazard Data for Crystal River Site from EPRI-SOG Study and Units 6 & 7 Study	2.5.2-134
2.5.2-209	Mean Hard Rock UHRS Accelerations (g)	2.5.2-136
2.5.2-210	HF and LF Horizontal 1E-04 Rock Spectra, Amplification Factors, Site Spectra, and Raw and Smoothed Envelope Spectra	2.5.2-137
2.5.2-211	Summary of Supplemental Sources and Truncated Woodward-Clyde Source	2.5.2-139
2.5.2-212	Geographic Coordinates of Supplemental Sources and Truncated Woodward-Clyde Source	2.5.2-140
2.5.2-213	Geographic Coordinates of Updated Charleston Seismic Source (UCSS) Model Sources	2.5.2-142
2.5.2-214	Comparison of Post-EPRI Magnitude Estimates for the 1886 Charleston Earthquake.....	2.5.2-143
2.5.2-215	Comparison of Talwani and Schaeffer and UCSS Age Constraints on Charleston-Area Paleoliquefaction Events	2.5.2-144

LIST OF TABLES (CONTINUED)

<u>Table Number</u>	<u>Title</u>	<u>Page</u>
2.5.2-216	List of Experts Contacted as part of Cuba and Northern Caribbean Source Model SSHAC Level 2 Process	2.5.2-145
2.5.2-217	Summary of Cuba and Northern Caribbean Seismic Source Parameters	2.5.2-146
2.5.2-218	Geographic Coordinates of Cuba Areal Source Zone	2.5.2-147
2.5.2-219	Geographic Coordinates of Cuba and Northern Caribbean Model Fault Sources	2.5.2-148
2.5.2-220	Empirical Relations between Rupture Area (A) and Moment Magnitude (M _w) and Rupture Length (L) and M _w Used to Determine M _{max} for Cuba and Northern Caribbean Sources.....	2.5.2-149
2.5.2-221	Significant Earthquakes in the Cuba and Northern Caribbean Region, 1500 to 2010	2.5.2-150
2.5.2-222	Comparison of Seismic Source Parameters with USGS Initial Seismic Hazard Maps for Haiti Region.....	2.5.2-152
2.5.2-223	Mean and Fractile Rock Seismic Hazard Curves	2.5.2-153
2.5.2-224	Percent Contribution to Deaggregation	2.5.2-158
2.5.2-225	Controlling Magnitudes and Distances from Deaggregation	2.5.2-161
2.5.2-226	Assigned Strong Motion Durations in P-SHAKE	2.5.2-161
2.5.2-227	HF and LF horizontal 1E-05 Rock Spectra, Amplification Factors, Site Spectra, and Raw and Smoothed Envelope Spectra	2.5.2-162
2.5.2-228	Horizontal 1E-04 and 1E-05 Site Spectra, Values of AR and DF, and GMRS.....	2.5.2-164
2.5.2-229	Smooth 1E-04, 1E-05, and 1E-06 Spectra at GMRS Elevation	2.5.2-165
2.5.2-230	V/H Ratios, Vertical 1E-04 and 1E-05 Site Spectra, Values of AR and DF, and GMRS	2.5.2-166
2.5.2-231	Regional Attenuation and Source Parameters Estimated in the Motazedian and Atkinson Study and Used in the Simulation of Ground Motions for the Cuba and Caribbean Region	2.5.2-167
2.5.2-232	Experts Contacted for the SSHAC Level 2 Study in Support of Cuba Hazard Sensitivity Calculations	2.5.2-168
2.5.2-233	Cuba Seismic Source Alternatives for Hazard Sensitivity Calculations.....	2.5.2-169
2.5.2-234	Cuba Areal Source Zone and Northern Cuba Subzone Recurrence Parameters.....	2.5.2-170
2.5.2-235	Completeness Periods and Earthquake Counts in Each Bin from the Phase 2 Earthquake Catalog	2.5.2-171
2.5.2-236	Summary of Seismic Source Parameters for Intraplate Cuba Fault Sources for Hazard Sensitivity Calculation	2.5.2-172
2.5.2-237	Moment Rates, Ratio of Fault-Based Moment Rate to Seismicity-Based Moment Rates, and Return Periods for M _w 6.5 and 7.0 from Cuba Sensitivity Options	2.5.2-173
2.5.2-238	Summary of Hazard Sensitivity Study Results: Comparison of MAFE	2.5.2-174
2.5.2-239	Summary of Hazard Sensitivity Results: Comparison of Rock Motion Amplitudes.....	2.5.2-175
2.5.2-240	Santaren Anticline Fault Source Parameters	2.5.2-176

2.4.6-239	Location and Lateral Extent of the Postulated Submarine Mass Failure for the Cape Fear Simulations and Local Bathymetry	2.4.6-99
2.4.6-240	Initial Wave Generated by NHWAVE (Dynamic Source) for the Cape Fear Submarine Failure Shown in Figure 2.4.6-239	2.4.6-100
2.4.6-241	Water Surface Profile in the Direction of the Slide Motion at Different Times after the Initiation of the Slide (Upper Panel) and Ocean Floor Profile (Lower Panel)	2.4.6-101

LIST OF FIGURES (CONTINUED)

<u>Figure Number</u>	<u>Title</u>	<u>Page</u>
2.4.6-242	Initial Wave for a Static Source Representation of the Cape Fear Submarine Failure Shown in Figure 2.4.6-239	2.4.6-102
2.4.6-243	Model Domain And Bathymetry in the Three Nested Grids Used in the FUNWAVE-TVD Simulations	2.4.6-103
2.4.6-244	Simulated Propagation of the Cape Fear Tsunami (Dynamic Source) in Grid A at 0, 20, 40, 60, 80, and 100 Minutes after the Submarine Failure	2.4.6-104
2.4.6-245	Simulated Propagation of the Cape Fear Tsunami (Dynamic Source) in Grid A at 120, 140, 160, and 180 Minutes after the Submarine Failure	2.4.6-105
2.4.6-246	Simulated Maximum Water Surface Elevation during the Propagation of the Cape Fear Tsunami (Dynamic Source) in Grid A.....	2.4.6-106
2.4.6-247	Simulated Propagation of the Cape Fear Tsunami (Dynamic Source) in Grid B at 100, 120, 140, 160, and 180 Minutes after the Submarine Failure	2.4.6-107
2.4.6-248	Simulated Maximum Water Surface Elevation during the Propagation of the Cape Fear Tsunami (Dynamic Source) In Grid B.....	2.4.6-108
2.4.6-249	Simulated Propagation of the Cape Fear Tsunami (Dynamic Source) in Grid C at 140, 160, 180, 200, 220, and 240 Minutes after the Submarine Failure	2.4.6-109
2.4.6-250	Simulated Maximum Water Surface Elevation during the Propagation of the Cape Fear Tsunami (Dynamic Source) In Grid C.....	2.4.6-110
2.4.6-251	(a) Water Depth Relative to MLW over the Area of Grid C; and (b) Water Depth Relative to the Assumed Initial Water Surface in the Cape Fear Tsunami Simulations	2.4.6-111
2.4.6-252	Simulated Maximum Water Surface Rise, relative to the Initial Sea Water Level, during the Propagation of the Cape Fear Tsunami (Dynamic Source) in the Vicinity of Units 6 & 7	2.4.6-112
2.4.6-253	Water Surface Elevation Near Units 6 & 7 as a Function of Time Following the Cape Fear Tsunami (Dynamic Source).....	2.4.6-113
2.4.6-254	Simulated Propagation of the Cape Fear Tsunami (Static Source) in Grid A at 0, 20, 40, 60, 80, and 100 Minutes after the Submarine Failure	2.4.6-114
2.4.6-255	Simulated Propagation of the Cape Fear Tsunami (Static Source) in Grid A at 120, 140, 160, and 180 Minutes after the Submarine Failure	2.4.6-115
2.4.6-256	Simulated maximum water surface elevation during the Propagation of the Cape Fear Tsunami (static source) in Grid A	2.4.6-116
2.4.6-257	Simulated Propagation of the Cape Fear Tsunami (Static Source) in Grid B at 100, 120, 140, 160, and 180 Minutes after the Submarine Failure	2.4.6-117
2.4.6-258	Simulated Maximum Water Surface Elevation during the Propagation of the Cape Fear Tsunami (Static Source) in Grid B.....	2.4.6-118
2.4.6-259	Simulated Propagation of the Cape Fear Tsunami (Static Source) in Grid C at 140, 160, 180, 200, 220, and 240 Minutes after the Submarine Failure	2.4.6-119

LIST OF FIGURES (CONTINUED)

<u>Figure Number</u>	<u>Title</u>	<u>Page</u>
2.4.6-260	Simulated Maximum Water Surface Elevation during the Propagation of the Cape Fear Tsunami (Static Source) in Grid C.....	2.4.6-120
2.4.6-261	Simulated Maximum Water Surface Rise, relative to the Initial Sea Water Level, during the Propagation of the Cape Fear Tsunami (Static Source) in the Vicinity Of Units 6 & 7	2.4.6-121
2.4.6-262	Water Surface Elevation near Units 6 & 7 as a Function of Time Following the Cape Fear Tsunami (Static Source).....	2.4.6-122
2.4.6-263	Outline of Maximum Credible Submarine Slide above the Florida Escarpment, Developed from Multibeam Bathymetric Data.....	2.4.6-123
2.4.6-264	Approximation of the Maximum Credible Submarine Slide above the Florida Escarpment with an Ellipse	2.4.6-124
2.4.6-265	Model Domain and Bathymetry in the Three Nested Grids Used in the FUNWAVE Simulations.....	2.4.6-125
2.4.6-266	Location and Lateral Extent of the Postulated Submarine Mass Failure for the Florida Escarpment Slide Simulations and Local Bathymetry	2.4.6-126
2.4.6-267	Initial Wave Generated by NHWAVE (Dynamic Source) for the Florida Escarpment Submarine Failure	2.4.6-127
2.4.6-268	(a) Water Surface Profiles in the Direction of the Slide Motion at Different Times after the Initiation of the Slide Obtained from NHWAVE and (b) Ocean Floor Profile (Lower Panel).....	2.4.6-128
2.4.6-269	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid A at 0, 20, 40, 60, 80, and 100 Minutes after the Submarine Mass Failure	2.4.6-129
2.4.6-270	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid A at 120, 140, 160, and 180 Minutes after the Submarine Mass Failure	2.4.6-130
2.4.6-271	Simulated Maximum Wave Height during the Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid A.....	2.4.6-131
2.4.6-272	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid B at 80, 100, 120, 140, and 160 Minutes after the Submarine Mass Failure	2.4.6-132
2.4.6-273	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid B at 200, 220, and 240 Minutes after the Submarine Mass Failure	2.4.6-133
2.4.6-274	Simulated Maximum Wave Height during the Propagation of the Florida Escarpment Tsunami (Dynamic Source) In Grid B.....	2.4.6-134
2.4.6-275	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid C at 140, 160, 180, and 200 Minutes after the Submarine Failure	2.4.6-135
2.4.6-276	Simulated Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid C at 140, 160, 180, 200, 220, and 240 Minutes after the Submarine Failure	2.4.6-136
2.4.6-277	Simulated Maximum Water Surface Elevation during the Propagation of the Florida Escarpment Tsunami (Dynamic Source) in Grid C.....	2.4.6-137

LIST OF FIGURES (CONTINUED)

<u>Figure Number</u>	<u>Title</u>	<u>Page</u>
2.4.6-278	(a) Water Depth Relative to MLW over the Area of Grid C without the Water Level Rise that is Used to Define the Initial Condition for the Tsunami Propagation Simulations; and (b) Water Depth Relative to the Assumed Initial Water Surface in the Florida Escarpment Tsunami Simulations	2.4.6-138
2.4.6-279	Simulated Maximum Water Surface Rise, relative to the Initial Sea Water Level, during the Propagation of the Florida Escarpment Tsunami (Dynamic Source) in the Vicinity of Units 6 & 7	2.4.6-139
2.4.6-280	Water Surface Elevation near Units 6 & 7 as a Function of Time Following the Florida Escarpment Tsunami (Dynamic Source).....	2.4.6-140
2.4.6-281	Initial Wave for a Static Source Representation of the Florida Escarpment Submarine Failure Shown in Figure 2.4.6-254.....	2.4.6-141
2.4.6-282	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid A at 0, 20, 40, 60, 80, and 100 Minutes after the Submarine Failure	2.4.6-142
2.4.6-283	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid A at 120, 140, and 160 Minutes after the Submarine Failure	2.4.6-143
2.4.6-284	Simulated Maximum Water Surface Elevation during the Propagation of the Florida Escarpment Tsunami (Static Source) in Grid A.....	2.4.6-144
2.4.6-285	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid B at 80, 100, 120, 140, 160, and 180 Minutes after the Submarine Failure	2.4.6-145
2.4.6-286	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid B at 200, 220, and 240 Minutes after the Submarine Failure	2.4.6-146
2.4.6-287	Simulated Maximum Water Surface Elevation during the Propagation of the Florida Escarpment Tsunami (Static Source) in Grid B.....	2.4.6-147
2.4.6-288	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid C at 140, 160, 180, and 200 Minutes after the Submarine Failure	2.4.6-148
2.4.6-289	Simulated Propagation of the Florida Escarpment Tsunami (Static Source) in Grid C at 220 and 240 Minutes after the Submarine Failure	2.4.6-149
2.4.6-290	Simulated Maximum Water Surface Elevation during the Propagation of the Florida Escarpment Tsunami (Static Source) in Grid C.....	2.4.6-150
2.4.6-291	Simulated Maximum Water Surface Rise, Relative to the Initial Sea Water Level, during the Propagation of the Florida Escarpment Tsunami (Static Source) in the Vicinity of Units 6 & 7	2.4.6-151
2.4.6-292	Water Surface Elevation near the Units 6 & 7 as a Function of Time Following the Florida Escarpment Tsunami (Static Source).....	2.4.6-152
2.4.6-293	Three-Dimensional View of Mass Transport Complex at the Great Bahama Bank.....	2.4.6-153
2.4.6-294	(a) Three-Dimensional View of the Two Southern Scars (b) Generalized Profile Showing the Variability of Mound Size with Respect to the Off-Bank Sediment Deposits Across the GBB Slope, and (c) Schematic Three-Dimensional Representation of the Slide...	2.4.6-154

LIST OF FIGURES (CONTINUED)

<u>Figure Number</u>	<u>Title</u>	<u>Page</u>
2.4.6-295	Location of Potential Submarine Slide Locations Along the Great Bahama Bank	2.4.6-155
2.4.6-296	(a) Ocean Bottom Profile Along Line A-A', (b) Map Showing the Location of Line A-A'	2.4.6-156
2.4.6-297	Location of Postulated Slide Location Along the Great Bahama Bank and Location of Seismic Profiles	2.4.6-157
2.4.6-298	Seismic Profile Line 5	2.4.6-158
2.4.6-299	Bathymetry in the Vicinity of the Postulated Slide Location	2.4.6-159
2.4.6-300	Ocean Bottom Profile Along the Line B-B'	2.4.6-160
2.4.6-301	Location and Lateral Extent of the Postulated Slope Failure Along the GBB for Case 1	2.4.6-161
2.4.6-302	Initial Wave Generated by NHWAVE for Case 1 (Dynamic Source, 7-Degree Slope), at 110 Seconds after Initialization of the Slide	2.4.6-162
2.4.6-303	Case 1 (Dynamic Source, 7-Degree Slope): Water Surface Profiles in the Direction of the Slide Motion at Different Times after the Initiation of the Slide Obtained from NHWAVE	2.4.6-163
2.4.6-304	Case 2 (Dynamic Source, 20-Degree Slope): Initial Wave Generated by NHWAVE at 140 Seconds after Initialization of the Slide	2.4.6-164
2.4.6-305	Case 2 (Dynamic Source, 20-Degree Slope): Water Surface Profile in the Direction of the Slide Motion at Different Times after the Initiation of the Slide	2.4.6-165
2.4.6-306	Case 1 (Dynamic Source, 7-Degree Slope): Simulated Propagation of the Tsunami Wave in Grid B at 2, 4, 6, and 14 Minutes after the Slope Failure	2.4.6-166
2.4.6-307	Case 1 (Dynamic Source, 7-Degree Slope): Simulated Maximum Wave Height in Grid B during the Propagation of the Tsunami Generated by the Slope Failure	2.4.6-167
2.4.6-308	Case 1 (Dynamic Source, 7-Degree Slope): Simulated Propagation of the Tsunami Wave in Grid C at 18, 30, 44, and 100 Minutes after the Slope Failure	2.4.6-168
2.4.6-309	Case 1 (Dynamic Source, 7-Degree Slope): Simulated Maximum Wave Height in Grid C during the Propagation of the Tsunami Wave Generated by the Slope Failure	2.4.6-169
2.4.6-310	Case 1 (Dynamic Source, 7-Degree Slope): Simulated Maximum Water Surface Rise, Relative to the Initial Seawater Level, in the Vicinity of the Turkey Point Units 6 & 7 Site during the Propagation of the Tsunami Wave Generated by the Slope Failure ..	2.4.6-170
2.4.6-311	Case 1 (Dynamic Source, 7-Degree Slope): Water Surface Elevation at the Turkey Point Units 6 & 7 Site as a Function of Time Following the Tsunami Wave Generated by the Slope Failure	2.4.6-171
2.4.6-312	Case 2 (Dynamic Source, 20-Degree Slope): Simulated Propagation of the Tsunami Wave in Grid B at 2, 6, 8, and 14 Minutes after the Slope Failure	2.4.6-172
2.4.6-313	Case 2 (Dynamic Source, 20-Degree Slope): Simulated Maximum Wave Height in Grid B during the Propagation of the Tsunami Generated by the Slope Failure	2.4.6-173

LIST OF FIGURES (CONTINUED)

(1996) (Reference 252) Amplification Factor Corrections (Open Diamonds) for a Spectral Frequency of 2.5 Hz	2.5.2-245
2.5.2-263	Horizontal GMRS for Caribbean Sources for Five GMPE Models for the Turkey Points Units 6 & 7 Site	2.5.2-246
2.5.2-264	Comparison of EPRI Mid-Continent (Reference 242) Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for PGA	2.5.2-247
2.5.2-265	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 25 Hz	2.5.2-248
2.5.2-266	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 10 Hz	2.5.2-249
2.5.2-267	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 5 Hz	2.5.2-250
2.5.2-268	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 2.5 Hz	2.5.2-251
2.5.2-269	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 1 Hz	2.5.2-252
2.5.2-270	Comparison of EPRI Mid-Continent Mean (dashed lines) and Caribbean Mean (solid lines) Attenuation Curves for Magnitudes 6, 7, and 8 for 0.5 Hz	2.5.2-253
2.5.2-271	Map Showing Cuba Single Areal Source Zone (solid black line), Six Sensitivity Areal Source Zones (dashed black lines), and Northern Cuba Subzone Used in Hazard Sensitivity Calculation (green shading). Seismicity (blue circles) is from the Phase 2 Earthquake Catalog. Thick Red Lines Show Plate Boundary Fault Sources Included in PSHA.	2.5.2-254
2.5.2-272	Map of Cuba Fault Sources and Santaren Anticline Fault Source for Hazard Sensitivity Calculations	2.5.2-255

LIST OF FIGURES (CONTINUED)

<u>Figure Number</u>	<u>Title</u>	<u>Page</u>
2.5.2-273	1 Hz Mean Hazard Curves Showing Sensitivity to Cuba Source Scenarios. Lower Panel is Expanded View of Yellow Box in Upper Panel.	2.5.2-256
2.5.2-274	10 Hz Mean Hazard Curves Showing Sensitivity to Cuba Source Scenarios. Lower Panel is Expanded View of Yellow Box in Upper Panel.	2.5.2-257
2.5.2-275	Total Mean Hazard Curves for 1 Hz (Upper) and 10 Hz (Lower) Showing Sensitivity to Four Cuba Source Scenarios	2.5.2-258
2.5.2-276	Seismic Sources from the U.S. Geological Survey's 2008 National Seismic Hazard Mapping Project	2.5.2-259
2.5.2-277	Not Used	2.5.2-260
2.5.2-278	Not Used	2.5.2-261
2.5.2-279	Not Used	2.5.2-262
2.5.2-280	Seismotectonic Source Zones in the CEUS SSC Model.....	2.5.2-263
2.5.2-281	Mmax Source Zones in the CEUS SSC Model	2.5.2-264
2.5.2-282	RLME Sources in the CEUS SSC Model	2.5.2-265
2.5.2-283	Contributions of Various Source Types to Hard Rock Hazard for 10 Hz.....	2.5.2-266
2.5.2-284	Contributions of Various Source Types to Hard Rock Hazard for 1 Hz.....	2.5.2-267
2.5.2-285	Comparison of Hard Rock UHRS.....	2.5.2-268
2.5.2-286	1 Hz and 10 Hz Mean Hazard Curves Showing Sensitivity to Santaren Anticline Fault Source.....	2.5.2-269
2.5.3-201	Potential Quaternary Features and Seismicity.....	2.5.3-14
2.5.3-202	Vegetated Depressions Identified Within Site Area from Photographs Taken Before Construction of the Cooling Canals	2.5.3-15
2.5.3-203	Site Region Seismicity.....	2.5.3-16
2.5.3-204	Lineament Analysis of South Florida for ASR Regional Study	2.5.3-17
2.5.3-205	Potential Quaternary Tectonic Structures within the Site Region.....	2.5.3-18
2.5.4-201	Site Plan Showing Structures and Finish Grade	2.5.4-125
2.5.4-202	Site Plan Showing Boring Locations	2.5.4-126
2.5.4-203	Geotechnical Cross Section D-D' Through Unit 6 Power Block	2.5.4-127
2.5.4-204	Geotechnical Cross Section E-E' Through Unit 6 Power Block.....	2.5.4-128
2.5.4-205	Geotechnical Cross Section F-F' Through Unit 6 Power Block	2.5.4-129
2.5.4-206	Geotechnical Cross Section A-A' Through Unit 7 Power Block.....	2.5.4-130
2.5.4-207	Geotechnical Cross Section B-B' Through Unit 7 Power Block.....	2.5.4-131
2.5.4-208	Geotechnical Cross Section C-C' Through Unit 7 Power Block	2.5.4-132
2.5.4-209	Plan Showing Geotechnical Cross Section Locations.....	2.5.4-133
2.5.4-210	Sonic Log Locations	2.5.4-134
2.5.4-211	Shear Wave Velocity at Greater Depth	2.5.4-135
2.5.4-212	Plot of Uncorrected SPT N-Values with Elevation.....	2.5.4-136
2.5.4-213	Plot of Corrected SPT-N ₆₀ Values with Elevation	2.5.4-137
2.5.4-214	Plot of CPT Data with Elevation	2.5.4-138
2.5.4-215	Plot of Rock RQD Data with Elevation (Sheet 1 of 2)	2.5.4-139
2.5.4-215	Plot of Rock RQD Data with Elevation (Sheet 2 of 2)	2.5.4-140
2.5.4-216	Plot of Fines Content with Elevation.....	2.5.4-141
2.5.4-217	Plot of Rock Unconfined Compressive Strength with Elevation	2.5.4-142
