Subject: RAI for Thorium 227 (TTC) amendment
Discussion:

- 1. In the 4/24/18 letter it is stated that a small amount of Ac-227 may be present in the TTC waste and that it needs to be taken into consideration when disposing of the waste. Specifically, how will waste from TTC operations be handled?
- 2. Page 4 of the 4/24/18 letter states that, "because of alpha contamination potential, DRS will impose more frequent independent confirmatory surveys for the facility than performed for Nuclear Medicine and PET Departments". What will the survey frequency be for the TTC facility?

Action Required: Wait for response
