All gauges are securely stored in a safe building and will remain safe & secure in what we identify as the showroom. They are under the direction of President John Norris.

Please contact me if you have any additional concerns.

Thanks,

larry

Larry,

No problem.

In my email dated 12/14/18 (the first email in this string), I specifically was seeking confirmation that “radium gauges would be stored in the “old building” on an interim basis, and that the intention would be for all of the radium gauges to be permanently stored in the “show room” in the future.”

Currently, I just need confirmation that all of the radium gauges will be stored in the show room in the future.

Richard-

Please list all the questions that you have so I can relay them to the local President. This is becoming time consuming and takes away from serving our customers. I understood that when we responded to the

original requests that this was resolved.

Intent?

Larry,

Thanks. Could you also confirm that the that the intention would be for all of the radium gauges to be permanently stored in the "show room" in the future?

Richard-

John Norris, President U-Haul Co of Alaska confirmed that all gauges are secure.

Larry,

I hope you had a great New Years. I just wanted to follow-up from our previous conversations to see if you have had the opportunity to follow-up with Mr. Norris.

Mr. Hine,

Thank you very much for your phone conversation with me earlier today. I just wanted to confirm some of the things that we discussed regarding AREC's 9/11/2018 response to NRC's questions for the property at 5700 Boundary Avenue, Anchorage, Alaska.

Specifically, I sought clarification as to whether the radium gauges would be stored in both the "show room" and the "old building" on a permanent basis. I also expressed NRC staff concerns about the structure of the "old building".

You informed me that the radium gauges would be stored in the "old building" on an interim basis, and that the intention would be for all of the radium gauges to be permanently stored in the "show room" in the future.

May I ask you to please confirm my understanding of the conversation we had earlier today, or to correct what was said?

Regards.
