SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 35-29433-01

Dear Mr. Harman,

By letter dated December 13, 2018, Mark Nammari, Business Segment Leader, informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated December 13, 2018, stated that radioactive materials procured and/or possessed by the licensee this license have been transferred back to the manufacturer and to your Texas Radioactive Materials License.

The supporting documentation to the NRC Form 314 also included transfer receipt documents from the manufacturer and leak tests performed prior to transfer. The leak test results document that there was no evidence of leakage of radioactive material from the radiation sources. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has transferred in accordance with regulatory requirements. The NRC license authorized temporary job sites (TJS) use and it is noted that storage of the sealed sources is under state jurisdiction. Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 6 to License No. 35-29433-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at (817) 200-1286 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/
