Lisle, IL 60532

Dear Mr. Tran,

This letter is a request to amend Michigan Technological University's Nuclear Materials License #21-00278-02 as follows:

1. Request for authorization to store 571 grams of uranium 238 until appropriate disposal can be arranged. The material was apparently brought to campus by a now retired faculty member in the 1970's and was only recently discovered by the RSO during a routine inspection of a chemical store room. The material is now securely stored in the University Waste Storage Room (Room 121 Minerals and Materials Building, MTU#12).
2. Request removal of Dr. Allen Niemi and Dr. Gary Fahnenstiel from the list of authorized user list. Dr. Niemi and Dr Fahnenstiel are no longer working at Michigan Tech.

Please let me know if you require any additional information.

Best wishes,

David C. Dixon PhD, RSO
