SUBJECT: Docket No. 71-9372, Framatome TN-B1 Shipping Container, 5 Year Renewal Request and Supplemental Information For Our Application For Approval For Incorporation Of ATRIUM 11 Fuel Assemblies.

References: (1) Framatome Letter TJT:18:031 dated September 6, 2018 "Docket No. 71-9372, Framatome TN-B1 Shipping Container, Application For Approval For Incorporation of ATRIUM 11 Fuel Assemblies.  
(2) US NRC Letter dated 21 June 2018 "CERTIFICATE OF COMPLIANCE NO. 9372, REVISION NO. 1, FOR THE MODEL NO. TN-B1 PACKAGE"

While Framatome works with the NRC to clarify the TN-B1 Certificate of Compliance (CoC) for the previous amendment request [Reference (1)], we formally request a five year renewal of CoC 9372 for the model TN-B1 packaging. The expiration date of the current certificate is April 30, 2019. This request is made to combine actions which we feel should assist the NRC with minimizing repetitive actions.

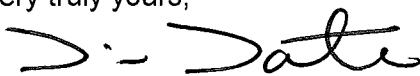

Reference (1) was our application for a revision to the CoC, which was an attachment to reference (2). That CoC contained a limitation that ATRIUM 11 fuel shall contain only commercial grade uranium. This restriction was unique to ATRIUM 11 fuel. Our application sought to remove the restriction and making the ATRIUM 11 subject to the same CoC conditions as the ATRIUM 10 and other fuel types permitted under this CoC.

During our discussions with the NRC PM and a review of the documents we had submitted with this application we found that we had not submitted a proposed revision to the CoC.

Attached is our proposed revision 2 to the TN-B1 CoC. We respectfully request the proposed CoC be considered as a part of our application.

If you have any questions concerning this request, please feel free to contact me at 509-375-8550 or Bryan Flanagan at 509-375-8537.

Very truly yours,

Timothy J. Tate, Manager  
Environmental, Health, Safety and Licensing
