Dear Ms. Call:

I would like to nominate Mr. Quinlan as the authorized U.S Nuclear Regulatory Commission (NRC) representative to chair the American Nuclear Society (ANS) Standards Committee Working Group for ANS-2.16, “Criteria for Modeling Design-Basis Accidental Releases from Nuclear Facilities.”

Mr. Quinlan is a Physical Scientist (Meteorologist) and is responsible for meteorological development, implementation, and oversight of licensing actions for new and operating power reactors.

In accordance with the Office of Management and Budget Circular No. A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities," January 26, 2016, the participation on a committee of an NRC-authorized representative does not connote agency agreement with, or endorsement of, decisions reached by the committee, or of standards approved and published as a result of the committee’s efforts. Agency representatives participating on consensus standards developing groups will, to the extent possible, ascertain the views of the agency on matters of interest and will express views that are consistent with established agency views.
