

Predecisional Enforcement Conference Summary

Licensee: Southern California Edison

Facility: San Onofre Nuclear Generating Station

License Nos.: DPR-13; NPF-10; NPF-15

Docket Nos.: 050-00206; 050-00361; 050-00362; 072-00041

EA-18-155

On January 24, 2019, representatives of Southern California Edison (SCE) met with U.S. Nuclear Regulatory Commission (NRC) personnel in the Region IV Office in Arlington, Texas, to discuss the two apparent violations described in NRC Inspection Report Number 050-00206/2018-005, 050-00361/2018-005, 050-00362/2018-005, 072-00041/2018-001 dated December 19, 2018 (Agencywide Document Access and Management System [ADAMS] Accession No. ML18341A172). The conference was held at the request of the licensee.

Doug Bauder, Vice President of Decommissioning and Chief Nuclear Office, and other staff from SCE presented their response to the apparent violations. The licensee presented a summary of the causes for the apparent violations and the associated corrective actions. Mr. Bauder stated that they accepted both apparent violations and supporting facts and circumstances, as described in the NRC inspection report. The licensee also discussed the safety significance of the two apparent violations and provided factors for consideration by the NRC when determining the final severity levels of the apparent violations.

The meeting was open to the public as a Category 1 meeting. The public was invited to observe the meeting, and the public had the opportunity to communicate with the NRC after the business portion of the meeting but before the meeting was adjourned. The meeting was broadcast via Webinar to allow public observation from remote locations.

The attachment provides the names of the individuals who participated in or observed the conference. Comments and questions from the public, obtained through the Webinar, are available for review at ADAMS Accession No. ML19035A301. The licensee's presentation is available at ADAMS Accession Nos. ML19023A033 and ML19036A957. The NRC's final presentation is available at ADAMS Accession No. ML19029B509. The video recording and transcript of the Webinar will be made available to the public in ADAMS or the NRC's web page at a later date.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this summary and its attachment will be made available electronically for public inspection in the NRC Public Document room or in the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
