REGION IV  
1600 E. LAMAR BLVD  
ARLINGTON TX 76011-4511

January 30, 2019

V. Troy Curnutt, RT(N)  
Radiation Safety Officer  
Diagnostic Imaging Services of Idaho  
1951 Bench Rd, Ste F  
Pocatello, ID 83201

SUBJECT: LICENSE AMENDMENT

Dear Mr. Curnutt:

Please find enclosed Amendment No. 10 to NRC License No. 11-34221-01 releasing for unrestricted use the fixed site at 1951 Bench Road, Suite F, and Pocatello, Idaho. In your letter dated October 31, 2018, you informed the U.S. Nuclear Regulatory Commission of your request to release for unrestricted use the fixed site, while continuing to provide mobile services at 1951 Bench Road, Suite F, Pocatello, Idaho, and all other mobile sites allowed on your current radioactive materials license.

The supporting documentation submitted by you indicated that there was no residual contamination. Based on this information, you concluded that all licensable material has been removed from the fixed site at 1951 Bench Road, Suite F, and Pocatello, Idaho and is therefore, suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use."

An environmental assessment for this licensing action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii). You should review this license carefully and be sure that you understand all conditions. You can contact me at 817-200-1286 if you have any questions about this license.

Note that your license and license conditions have been updated in a new format. Please review your license and notify this office if you have any discrepancies or questions.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement is not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:  
<http://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>.

An electronic version of the NRC's regulations is available on the NRC Web site at [www.nrc.gov](http://www.nrc.gov). Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

**/RA/**
