Attention: Elizabeth Ullrich

RE: Request for transfer of the E.I. du Pont de Nemours and Company, Inc. consolidated sites US NRC Radioactive Material License Number 07-13441-02 to DuPont Specialty Products USA, LLC.

Dear Ms. Ullrich,

In August of 2017, E.I. du Pont de Nemours and Company ("DuPont") and The Dow Chemical Company merged and each became a wholly-owned subsidiary of DowDuPont, Inc. as part of a planned corporate reorganization. As the next step of that reorganization, DowDuPont is now preparing to separate into three independent publicly-traded companies with one company focused on agriculture, one on material science, and one on specialty products. DowDuPont will be realigning its business entities so that the facilities and permits are held by the appropriate wholly-owned subsidiaries of DowDuPont.

More specifically, we respectfully request that control and management of licensed material, inclusive to the E.I. du Pont de Nemours and Company, Inc. consolidated site's US NRC Radioactive Material License Number 07-13441-02, used or stored at the licensee's facilities located at;

- A. Stine-Haskell Research Center, 1090 Elkton Road, Newark Delaware, 19714 [Field Plot Only]
- B. Experimental Station, 200 Powder Mill Road, Wilmington, Delaware, 19803
- C. Chestnut Run Plaza, 4417 Lancaster Pike, Wilmington, Delaware, 19805

be transferred from E.I. du Pont de Nemours and Company to DuPont Specialty Products USA, LLC, ("DuPont Specialty Products"), a subsidiary of Performance Specialty Products NA, LLC ("Performance Specialty Products") a wholly-owned subsidiary of DowDuPont and will be focused on specialty products. These corporate realignments are expected to be completed on or about June 1, 2019, and Performance Specialty Products will begin operating as an independent, publicly-traded company. We respectfully request and accept a transfer in ownership, responsibility and liability for all radioactive materials and Radiation Program requirements including oversight of the security and safe use and disposal of licensed materials at the three sites listed above.

The necessary notifications, assurances, and agreements will be submitted to accomplish the necessary license transfers associated with these realignments. Mr. John M. Brisbin, E.I. du Pont de Nemours and Company (NRC License 07-13441-02) Radiation Safety Officer, may be contacted for additional information at (302) 695-6896, cell (302) 420-2233, or by E-mail at JOHN.M.BRISBIN@USA.dupont.com.

Sincerely,

Myoshi C. Aubain

This is to acknowledge receipt of your: Letter and/or Application Dated: 01/25/2019

The initial processing, which included an administrative review, has been performed.

Amendment Termination New License Renewal

There were no administrative omissions identified during our initial review.

This is to acknowledge receipt of your application for renewal of the material(s) license identified above. Your application is deemed timely filed, and accordingly, the license will not expire until final action has been taken by this office.

Your application for a new NRC license did not include your taxpayer identification number. Please complete and submit NRC Form 531, Request for Taxpayer Identification Number, located at the following link: <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc531.pdf>
Follow the instructions on the form for submission.

The following administrative omissions have been identified:

Your application has been assigned the above listed MAIL CONTROL NUMBER. When calling to inquire about this action, please refer to this control number. Your application has been forwarded to a technical reviewer. Please note that the technical review, which is normally completed within 180 days for a renewal application (90 days for all other requests), may identify additional omissions or require additional information. If you have any questions concerning the processing of your application, our contact information is listed below:
