---

Bill/Fran/Littia:

Attached are NRC comments on Sections 4.5 – 4.7 of the revised Agreement application. Hopefully the comments are self-explanatory and the suggested changes useful. Once you had an opportunity to review the comments, lets discuss how to best resolve them. As I previously indicated, this can be accomplished either via conference call/webinar or in person.

Please feel free to contact me if you have any questions.

Regards,  
Duncan
