Subject: NRC Request for Additional Information for Tectonic Engineering & Surveying Consultants P.C. License Renewal (Mail Control Number 610109)
Date: Thursday, February 07, 2019 10:57:00 AM

Licensee: Tectonic Engineering & Surveying Consultants P.C.
License No.: 06-31339-01
Docket No.: 030-37849
Control No.: 610109

PLEASE CONFIRM RECEIPT OF THIS REQUEST FOR ADDITIONAL INFORMATION BY RETURN EMAIL

Dear Mr. Scala:

This is in reference to Tectonic Engineering & Surveying Consultants P.C.'s application dated September 28, 2018 and response letter dated January 14, 2019, requesting to renew Nuclear Regulatory Commission License No. 47-31315-01.

As discussed by telephone yesterday, we still need the following additional information in order to complete our review.

1. Please indicate what happened to the sealed sources/gauges that were located at 1209 Main Street, Coventry, CT location (i.e., were they transferred to the Hartford or Rocky Hill, CT locations or to another authorized location, or to another authorized recipient).
2. In your original renewal application, you indicated that training would be in accordance with NUREG-1556, Vol. 1, **Revision 1**, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Portable Gauge Licenses." However, **Revision 2** was published in June 2016 and is slightly different. (You can download it here <https://www.nrc.gov/docs/ML1617/ML16175A375.pdf>). Please confirm that you will use **Revision 2** by stating "Before using licensed materials, authorized users will have successfully completed one of the training courses described in the "Criteria" part of the section titled "Training for Individuals Working in or Frequenting Restricted Areas" in NUREG-1556, Vol. 1, Rev. 2, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Portable Gauge Licenses."

We will continue our review upon receipt of the requested information. You may respond to my attention in writing by letter, email (if letter is signed by senior management and scanned into a pdf format), or fax (610-337-5269), referencing mail control number 610109. Please submit a reply within 30 days. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5006.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you in advance for your help!

Jan
