NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

March 4, 2019

Mr. David B. Hamilton
Site Vice President
FirstEnergy Nuclear Operating Company
Perry Nuclear Power Plant
Reg Affairs–A210
10 Center Road, P.O. Box 97
Perry, OH 44081–0097

SUBJECT: ANNUAL ASSESSMENT LETTER FOR PERRY NUCLEAR POWER PLANT
(REPORT 05000440/2018006)

Dear Mr. Hamilton:

The NRC has completed its end-of-cycle performance assessment of Perry Nuclear Power Plant, reviewing performance indicators (PIs), inspection results, and enforcement actions from January 1, 2018 through December 31, 2018. This letter informs you of the NRC's assessment of your facility during this period and its plans for future inspections at your facility. The NRC concluded that overall performance at your facility preserved public health and safety.

The NRC determined the performance at Perry Nuclear Power Plant during the most recent quarter was within the Licensee Response Column, the highest performance category of the NRC's Reactor Oversight Process (ROP) Action Matrix, because all inspection findings had very low safety significance (i.e., Green), and all PIs were within the expected range (i.e., Green). Therefore, the NRC plans to conduct ROP baseline inspections at your facility.

In the first quarter of 2018 Perry Nuclear Power Plant was in the Regulatory Response Column (column 2) of the ROP Action Matrix due to a White (low to moderate safety significance) finding in the Mitigating Systems Cornerstone (ADAMS ML17236A187). In February 2018, the NRC completed a supplemental inspection (ADAMS ML18086B212) that reviewed the sufficiency of your corrective actions for the causes of the White finding and notified you that Perry Nuclear Plant's performance was determined to be in the Licensee Response Column (column 1) of the ROP Action Matrix as of April 1, 2018.

The enclosed inspection plan lists the inspections scheduled through December 31, 2020. This updated inspection plan now includes planned security inspections which were formerly transmitted under separate correspondence. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. Routine inspections performed by resident inspectors are not included in the inspection plan. You should be aware that the agency is pursuing potential changes to the ROP, including changes to engineering inspections (SECY–18–0113, "Recommendations for Modifying the Reactor Oversight Process Engineering Inspections"). Should these changes to the ROP be implemented, the engineering and other region-based inspections are subject to change in scope, as well as schedule, beginning in January 2020. The inspections listed during the last twelve months of the inspection plan are tentative and may be revised. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes.

In April and May 2020, the NRC will conduct a triennial Design Bases Assurance Inspection (Team) and in November 2019 a biennial Problem Identification and Resolution team inspection.

This letter, its enclosure, and your response (if any) will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with 10 CFR 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Please contact Dariusz Szwarc at 630-829-9803 with any questions you have regarding this letter.

Sincerely,

/RA Robert Orlikowski Acting for/

Julio Lara, DRP Division Director
Region III
Division of Reactor Projects
