Subject: NRC Notification to the State of Florida Regarding Turkey Point License Amendments - Revise NFPA 805 License Condition for Reactor

Good morning Ms. Becker,

As a follow-up to my phone message from earlier this morning, the U.S. Nuclear Regulatory Commission (NRC) is about to issue license amendments for Turkey Point Nuclear Generating, Units 3 & 4. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of these amendments.

Please reply if the State of Florida has comments on the following licensing action submitted to the NRC by

Florida Power & Light Company, et al. (the licensee): "License Amendment Request 265, Revise NFPA 805 License Condition for Reactor Coolant Pump Seals" dated October 24, 2018 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18292A842), as supplemented by letter dated October 24, 2018, December 3, 2018 and January 31, 2019 (ADAMS Accession Numbers ML18297A032, ML18338A053, and ML19031C866 respectively).

The associated proposed no significant hazards consideration for this amendment request was published in the Federal Register on December 26, 2018 (83 FR 66318).

Your response is requested by March 8, 2019. If you have any questions, please call or e-mail me.

Thanks,

Perry Buckberg
