Re: Peach Bottom Atomic Power Station  
NPDES Permit PA 0009733  
Entrainment Characterization Study Work Plan

Dear Mr. Brozonis,

The Department of Environmental Protection (DEP) has reviewed the "Work Plan for an Entrainment Characterization Study" for the Peach Bottom Atomic Power Station dated February 25, 2011.

The work plan is consistent with the NPDES permit requirements relating to the entrainment characterization study in Part C. Therefore, DEP has no additional comments and the work plan is approved. As stated in the work plan, the sampling is scheduled to commence during the week of March 4, 2012.

Please contact Heidi Biggs at [hbiggs@state.pa.us](mailto:hbiggs@state.pa.us) or 717-772-5656 if you have any questions or comments.

Sincerely,

Lee A. McDonnell, P.E.  
Program Manager  
Water Management Program
