Subject: [External_Sender] 130304 request to extend expiration date of Draft License XSOU8844

Hello Joanne – Southern Ionics Minerals requests that the **expiration date on DRAFT License XSOU8844 be extended to December 31, 2024** instead of the expiration date proposed on the original application of December 31, 2022.

We believe an extension of the expiration date is justified and warranted. Our application submitted in 2017 anticipated 5 years of rare earth mineral sand processing and export. With the delays in processing our application, due in part, to the government's moratorium on issuing export licenses of nuclear materials to China our processing and export schedule has been pushed back by 2 years.

We appreciate your attention to this.

Jim Renner

Subject: RE: RE: Review of Draft License XSOU8844

Good Morning Jim,
Regarding the expiration date of the license, could you please send me that request in a separate email? Would like to make that email public. Also, to confirm the expiration date will be December 31, 2024?

Thank You,

Joanne

Subject: [External_Sender] RE: Review of Draft License XSOU8844

Thanks Joan. I will review and respond asap. Only thing I see immediately is that the term of license should be extended to 5 years from now, not our original submittal.

Thanks, Jim

Subject: Review of Draft License XSOU8844

Hello,
Please review the attached draft of NRC export license XSOU8844, and let me know if there are any changes.

This is a draft license; and it has not been signed. Once it is finalized and signed, a COPY of the signed license will be e-mailed to you, followed by the ORIGINAL license that will be mailed to

you.

Please respond to this request within 3 business calendar days, or let us know if you need additional time to review the draft. If we do not hear from you within 3 business calendar days, we will assume it is acceptable and may issue the license as presented here.

Thank You,

Joanne Savoy
