General Comment

The Commonwealth of Massachusetts has filed a hearing request, because they are concerned there is not enough money in the Pilgrim decommissioning trust fund. The Commonwealth also wants the land decontaminated to less than 10 millirem due to safety reasons. This is hypocritical; this will take even more money from the decommissioning trust fund unnecessarily.

The Commonwealth does not have jurisdiction over nuclear safety; that is the Federal Government, which has been delegated to the NRC. The NRC has a 25 millirem decontamination standard.

Therefore, the Department of Justice and the NRC should take the Commonwealth to court for infringing on the Federal Governments authority.
