---

Kristen/Lisa,

I reached out to one the licensees and got the below response. Please let me know what I need to do as a result.

Thanks,  
Sam

The Nuclear Regulatory Commission recently published a Federal Register Notice announcing our intent to submit an information collection request to the Office of Management and Budget (OMB) for NRC Form 790. A supporting statement describing the requested information is available at <http://regulations.gov> by searching docket NRC-2018-0106.

As a potential respondent to this information collection, we are interested in your feedback. Specifically, we are seeking input on the following questions by 3/13/2019:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

If done electronically the form is very generic ( titles) so as not to be SRI. It is hard to track it back to actual document. Therefore I am not sure of practicality

2. Is the burden estimate accurate?

No. The form to be submitted electronically requires a DC of the form and requires filing of the electronic form in records management system.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

Decide what you want. Do you just want numbers and classification levels. Or do you want to know areas of classification work.

Also know for RD we cannot declassify.

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

If you just want numbers and types of actions don't take risk of electronic submission. Just ask for forms to be kept onsite and send numbers periodically.

Comments can be submitted by going to <http://www.regulations.gov> and searching for Docket No. NRC-2018-0106. Please note that comments will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

If you have any questions regarding this correspondence, please contact me via email or telephone.
