#TBT - This scientist is best known for discovering an important element, as well as winning the Nobel Prize in Chemistry. His other claim to fame – and the one he apparently cherished most highly – was having an element named in his honor. What was the scientist's name? What element did he discover and which one was named for him?

They say practice makes perfect. Because we need to be ready to respond to a #nuclear power plant emergency, several times a year we practice what we'd do. For example, staff recently played in an exercise at the #PeachBottom nuclear power plant. We sent a site team to participate alongside plant responders, and state and local response agencies at the various emergency facilities. We also staffed our own incident response center in the Region I Office in King of Prussia, Pa.... [See More](#)

Our Region II Incident Response Center staffed up Thursday evening as the agency began around-the-clock monitoring of #HurricaneFlorence. The two NRC-licensed facilities near the eye of the slow-moving high Category 1 storm – the #Brunswick #nuclear plant and Global Nuclear Fuels – have shut down operations. #NRC inspectors are at Brunswick 24/7, and the IRC maintains contact with all affected sites and will remain staffed as long as conditions require.

NRC @NRCgov · 14 Sep 2018

The #Brunswick #nuclear plant and Global Nuclear Fuels have shut down operations. #NRC inspectors are at Brunswick 24/7 and staff in our Incident Response Center in Atlanta is maintaining contact sites affected by #HurricaneFlorence.
