Mr. Lawyer,

I just received our new license amendment for LEU. I was wondering why there are changes to the description of the DU powder. On the previous amendment it was listed as:

O. Uranium (Natural or Depleted) O. Solid (powders, pellets, and ceramics) O. 14.6 kilograms total

The new one has it listed as:

P. Uranium P. Solid P. 14.6 kilograms total

I'm sure there is a reason for the change, I just don't know what it is.

Sincerely,

Philip O. Brown RSO, LSO
