 Operating Reactors Branch 4

Docket Nos. 50-280  
 50-281  
 License Nos. DPR-32  
 DPR-37

Dear Mr. Rusche:

This is to advise you that because of certain calculational errors, the data reported in the 1974 operating reports for the Surry Power Station, Unit Nos. 1 and 2, for noble gases released is incorrect. We originally reported the total noble gas release for 1974 as 55,000 curies. The 1974 data has been reviewed and the actual quantity of noble gases released was 6,870 curies. Corrections were made to the August and September reported values.

We have kept the Regulatory Staff informed concerning this matter and document the above for the record.

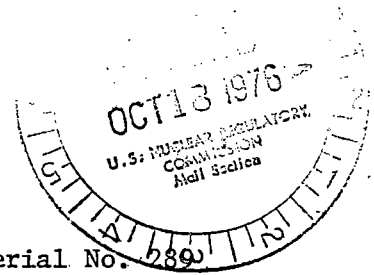

Very truly yours,

C. M. Stallings  
 Vice President-Power Supply  
 and Production Operations
