

VIRGINIA ELECTRIC AND POWER COMPANY

RICHMOND, VIRGINIA 23261

September 1, 1978

W. L. PROFFITT
SENIOR VICE PRESIDENT

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
Attn: Mr. O. D. Parr, Chief
Light Water Reactors Branch No. 3
Division of Project Management
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Serial No. 297/051978
LQA/RMN:esh
Docket Nos. 50-280/50-281
50-338/50-339
50-404/50-405

Dear Mr. Denton:

In a letter dated May 19, 1978, Mr. A. L. Toalston, a member of your staff asked for information concerning additional ownership participants in Surry Power Station and North Anna Power Station. Vepco signed an agreement on April 14, 1978, which is subject to NRC and other regulatory approvals, to sell an undivided interest in its existing and presently planned nuclear generating capacity to Old Dominion Electric Cooperative and North Carolina Electric Membership Corporation. Old Dominion's interest will be between 20 MWe and 80 MWe of each unit. North Carolina's interest will be less than 20 MWe per unit. Therefore, according to Mr. Toalston's letter, we need only answer question No. 9 in Appendix L of 10CFR50 for Old Dominion and no information is required for North Carolina Electric.

Old Dominion Electric Cooperative is organized under the laws of the Commonwealth of Virginia for the purpose of providing electric energy to its member-cooperatives. At the present time Old Dominion does not own facilities or supply power to its member-cooperatives. The purchase of an interest in generating facilities will be financed with loans guaranteed by the Rural Electrification Administration and from the National Rural Utilities Cooperative Finance Corporation.

The nuclear generating capacity purchased will not meet the full needs of Old Dominion's member-cooperatives. Old Dominion will purchase additional power from Vepco and other sources to meet the requirements of its member-cooperatives. Prior to approval of the REA loan, the member-cooperatives will be required to sign a 45-year, all requirements wholesale power contract with Old Dominion.

Old Dominion's membership consists of the sixteen distribution cooperatives listed in Appendix A. Thirteen of the cooperatives receive their principal power requirements from Vepco and three receive their power from Delmarva Power and Light Company. Small amounts of power are received from the Southeastern Power Administration, the Potomac Edison Company and through internal generation by two of the cooperatives. The distribution cooperatives are not directly interconnected. Upon completion of the acquisition of generating facilities, Old Dominion will become the power supplier

for its member-cooperatives, acquiring power through owned generation and purchases and reselling the power to its members.

A number of the member-cooperatives provide retail service in areas adjacent to services areas served by non-affiliated utility systems with peak loads smaller than Old Dominion's peak or the distribution cooperative's peak load. Appendix B lists those systems, the adjacent cooperative and the available information about each of the systems.

Since Old Dominion does not own, or plan to own, transmission facilities, one line diagrams are not submitted. Please let us know if additional information is needed.

Very truly yours,

W. L. Proffitt

Non-affiliated Utility Systems Providing
Service in Areas Adjacent to Old Dominion
Member-Cooperatives With Peak Loads
Smaller than the Member-Cooperatives and/or
Old Dominion

Listed first is the member-cooperative followed by the information for adjacent systems:

1. Choptank Electric Cooperative

Town of Easton
Easton, Maryland 21601

- a. 1977 load 22,300 KW
- b. peak occurred in January
- c. Growth 8%
- d. Net generation 44,600 KW
- e. 6.25 MW largest unit (diesel)
- f. 20% reserve

St. Michaels Utilities Commission
St. Michaels, Maryland 21663

- a. 1977 load 7757 KW
- b. peak occurred in January
- c. NA
- d. No generation
- e. NA
- f. NA

Town of Centreville
Centreville, Maryland 21617

- a. 1977 load 6950 KW
- b. peak occurred in July
- c. NA
- d. No generation
- e. NA
- f. NA

Town of Berlin
Berlin, Maryland 21811

- a. 1977 load 3607 KW
- b. peak occurred in January
- c. NA
- d. Small amount of generation (diesel)
- e. NA
- f. NA

2. Community Electric Cooperative

City of Franklin
Municipal Building
207 West 2nd Avenue
Franklin, Virginia 23851

- a. 1977 peak load - 17,890 kw
- b. Peak occurred in January
- c. Growth - 7.4%
- d. Generation - none
- e. Largest Unit - NA
- f. Reserve - NA

Town of Wakefield
Wakefield, Virginia 23888

- a. 1977 peak load - 1608 kw
- b. Month of peak - August
- c. Growth - 4.3%
- d. Generation - none
- e. Largest unit - NA
- f. Reserve - NA

3. Delaware Electric Cooperative

Smyrna-Clayton Electric System
Town of Smyrna
Smyrna, Delaware 19977

- a. 1977 peak load - 7,500 kw
- b. not available
- c. " "
- d. " "
- e. " "
- f. " "

City of Milford
Milford, Delaware 19963

- a. 1977 peak load - 13,500 kw
- b. not available
- c. " "
- d. " "
- e. " "
- f. " "

(Delaware Electric Cooperative continued)

Town of Lewes
Lewes, Delaware 19958

- a. 1977 peak load - 6,600 kw
- b. not available
- c. " "
- d. " "
- e. " "
- f. " "

City of Seaford
Seaford, Delaware 19973

- a. 1977 peak load - 9,300 kw
- b. not available
- c. " "
- d. " "
- e. " "
- f. " "

Lincoln Ellendale Electric Company
Ellendale, Delaware 19941

- a. 1977 peak load - 2,300 kw
- b. not available
- c. " "
- d. " "
- e. " "
- f. " "

4. Mecklenburg Electric Cooperative

City of Danville
P.O. Drawer 3308
Danville, Virginia 24541

- a. 1977 peak load - 128,400 kw
- b. Month of Peak - July
- c. Growth - 8.4%
- d. Generation Capacity - 39,125 kw
- e. Largest thermal unit - 12,500 kw
- f. Reserve - NA

5. Northern Piedmont Electric Cooperative

Town of Culpeper
Culpeper Office Building
Culpeper, Virginia 22701

a. Peak load - less than 700 kw

(other data unavailable)

6. Prince George Electric Cooperative

Town of Wakefield
Wakefield, Virginia 23888

(data given for Community Electric Cooperative)

7. Prince William Electric Cooperative

City of Manassas
9025 Center Street
Manassas, Virginia 22110

- a. 1977 peak load - 17,142 kw
- b. Month of peak - July
- c. Growth - not available
- d. Generation - none
- e. Largest unit - NA
- f. Reserve - NA

8. Shenandoah Valley Electric Cooperative

Harrisonburg Electric Commission
89 West Bruce Street
Harrisonburg, Virginia 22801

- a. 1977 peak load - 41,700 kw
- b. Month of peak - July
- c. Load growth - 5.7%
- d. Generation - none
- e. Largest unit - NA
- f. Reserve - NA

(Shenandoah Valley Electric Cooperative continued)

Town of Elkton
173 West Spotswood
Elkton, Virginia 22827

- a. 1977 peak load - 3,150 kw
- b. Month of peak - January
- c. Growth - 6.8%
- d. Generation - None
- e. Largest unit - NA
- f. Reserve - NA

9. Southside Electric Cooperative

City of Bedford
P.O. Box 807
Bedford, Virginia 24523

- a. Peak demand - 30,690 kw
- b. Month of peak - January 1978
- c. Growth - $7\frac{1}{2}$ to 8%
- d. Generation - 1000 kw (hydro)
- e. Largest thermal unit - none
- f. Reserve - NA

Town of Blackstone
Municipal Building
100 West Elm Street
Blackstone, Virginia 23824

- a. 1977 peak load - 6,722 kw
- b. Month of peak - August
- c. Growth - 8.5%
- d. Generation - None
- e. Largest unit - NA
- f. Reserve - NA
