Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Dear Mr. Moseley:

This is to inform you that a commitment regarding the records management program at the Surry Power Station has not been met. In our Quality Assurance Program Topical Report VEP-1-A and in our response to IE Report Nos. 50-280/76-7 and 50-281/76-7 we stated that we would implement a satisfactory records management program by January 1, 1977. Several unexpected occurrences have caused this date to be exceeded. As you know, our storage space is limited and therefore we have relied heavily on microfilmed records. We have experienced a great deal of difficulty with the microfilming equipment which has slowed our progress a great deal. As a result of this difficulty, we have acquired additional microfilm equipment and have hired additional temporary employees. It is expected that this will result in a satisfactory records management program by July 1, 1977.

Very truly yours,

*G. M. Stallings*  
G. M. Stallings  
Vice President-Power Supply  
and Production Operations
