As per our telephonic discussion last week, here it the information to submit to request the withdrawal of your renewal application dated 12/26/2018. Based on our discussion, your NRC radioactive materials license was renewed in its entirety on April 13, 2018, Amendment No. 4.:

- On company letterhead, request to withdraw the renewal application dated December 26, 2018. Based on the fact that it was a duplicate request of the April 10, 2018 renewal application submittal; therefore the December 26, 2018 renewal application request is withdrawn.
- Be sure to sign & date the letter and email it back to me in pdf format.

As soon as I receive the letter, I can finish the review of this action. If you have any questions, feel free to contact me.

Thank you for your prompt attention to this request.

Ms. Hanson,

This letter is a request to withdraw the renewal application submitted by ENCON, dated December 26, 2018. This request is based on the fact that it was a duplicate request of the April 10, 2018 renewal application. I appreciate your assistance.

Should you have any questions, please contact our office at (915) 833-3740.

Sincerely,

Alex Woelper, P.E.

If the licensee sent the renewal application by mistake ask them to provide a signed and dated retraction letter.

Subject: Encon International mystery solved

Encon license was renewed in April 13, 2018 by me when I issued Amendment 4. The licensee sent what appears to be a renewal application package. Call them to see if what they submit is an amendment instead of a renewal (something that they want to change in the license).

Since the license is not up for renewal when Carol set up another renewal the system did not comprehend and gave you a blank expiration date. It looks this action will need to be voided because of the following reasons:

1. The pending renewal cannot be changed to a pending amendment (WBL will not let you do the change) if it turns out it is an amendment only, or
2. The licensee sent a renewal application package by mistake and the action will have to be voided anyways.
