Additionally, in accordance with our regulatory commitment submitted in the referenced letter, the required information for apportionment of radiation dose between the operating units and the shutdown unit is provided. Between January 1, 2018 and December 31, 2018, a total of 3285 individuals were monitored for occupational exposure to ionizing radiation at DNPS.

The total collective TEDE for the individuals monitored was 118.831 rem. Of the 2018 DNPS total site exposure, 118.647 rem is associated with operating units (Units 2 and 3) activities and 0.184 rem is associated the non-operating unit (Unit 1) activities. Of the 3285 individuals who were monitored for exposure to ionizing radiation at DNPS, approximately 137 of these individuals performed activities that were directly related to Unit 1.
