Dear Mr. Burch:

The U.S. Nuclear Regulatory Commission (NRC) conducted a routine inspection of the Material Control and Accounting (MC&A) safeguards program at the BWXT Nuclear Operations Group Lynchburg facility (BWXT NOG) from March 11-14, 2019. The purpose of this inspection was to determine whether activities authorized by your license were conducted safely and in accordance with NRC requirements. The enclosed report presents the results of the inspection that were discussed with members of your staff during an exit meeting held at the end of the inspection on March 14, 2019.

This inspection examined activities conducted under your license as they relate to public health and safety, the common defense and security, and to confirm compliance with the Commission's rules, regulations, and the conditions of your license. Areas examined during this inspection included management structure, item monitoring, process monitoring, measurement systems and control, physical inventory, internal control, alarm resolution, assessment, and recordkeeping. Within these areas, the inspection consisted of performance tests, selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress. No violations of more than minor significance were identified.
