**SUBJECT: TRANSMITTAL OF MOAB UMTRA PROJECT CRESCENT JUNCTION
DISPOSAL CELL INTERIM COMPLETION REPORT ADDENDUM H**

Dear Mr. Mandeville:

The Moab Uranium Mill Tailings Remedial Action (UMTRA) Project began building the Crescent Junction disposal cell in June 2007 and has since been actively placing uranium mill tailings and residual radioactive materials (RRM) in the cell. Because it will take several years to build the disposal cell in its entirety, the Moab UMTRA Project will produce multiple Interim Completion Reports to document data during the ongoing construction process. These Interim Completion Reports will be written in the format of sequential addenda that are referenced in a Final Completion Report that will be prepared to address the entire cell construction.

Enclosed are five copies of Interim Completion Report Addendum H which addresses activities performed from October 1, 2017, through September 30, 2018. This report includes placement of 316,385 yd³ of RRM.

If you have any questions, please contact me at (970) 257-2115.

Sincerely,

Russell McCallister
Federal Cleanup Director
Moab UMTRA Project
